Systems

QX-10

with **FREE**
RX-80 printer!

The QX-10, along with its proprietary VALDOCS operating system and the specially-designed HASCI keyboard, takes 8-bit microprocessor technology to its limit. VALDOCS is the easiest-to-learn software system ever designed for a personal computer. Not only is it easy to use, it's also versatile; it contains a sophisticated word processor, a graph drawing system, an electronic mail system, a scheduler (kind of an electronic appointment calendar), and one of the most powerful indexing and filing systems on the market. All these software tools are tied in to each other, and the user communicates with this powerful software in English, not in computerese. VALDOCS is not the only software the QX-10 can use; the vast world of CP/M programs is also available to the owner of an Epson QX-10.

With purchase of the QX-10
you will receive an Epson
RX-80 printer **FREE**

\$1995.

FX-80

FX-80, FX-100

The Epson FX printers are designed for high speed and maximum flexibility. Both print at 160 CPS on a high-resolution 9x9 matrix. 128 different typestyles plus graphics provide numerous options for reports, memos, spreadsheets, and graphic presentations. Both friction and tractor feed are part of the FX-100's capabilities, with the tractor adjustable from 4" to 16". The FX-80 features both friction and adjustable pin-feed, with an adjustable tractor available as an option.

LQ-1500

LQ-1500

The LQ-1500 is a high-performance dot matrix printer made to revolutionize the office. With its 24-pin printhead, the LQ-1500 does the work of a letter-quality printer, a graphics printer, and a high-speed draft printer. In its letter quality mode, you get fully formed letters at a fast 67 CPS. And with a resolution of 240x180 dpi with 10 different bit-image modes, the LQ-1500 provides a wealth of graphics possibilities. In draft mode, the LQ-1500 prints at a productive 200 characters per second!

LQ-1500	List Price 1399	\$1099.00
Parallel interface		\$99.95

ASHTON-TATE

dBASE II

dBASE II is a window into an entirely new way of managing your business world. It's a business productivity tool based on an advanced concept used on large mainframe computers, that of the relational database management system (DBMS). dBASE II gives you flexibility and freedom simply not found in any of the vertical, dedicated business programs available for your micro-computer.

List Price \$499.00

Upgrade your dBASE II to dBASE III

dBASE III

dBASE III uses powerful yet simple commands that are the next best thing to speaking English. If you're unsure of a command, HELP will tell you what to ask for. If you don't know what command comes next, a command assistant does. All you have to know is what you want it to do. Our new tutorial/manual will have you entering and viewing data rather than reading for hours. And to make matters easier, you get full screen report setup for simple information access.

It's fast! It's easy! It's the most powerful database management system for your 16-bit PC

- ▶ Over a billion records per database*
- ▶ 128 fields per record
- ▶ Variable-length text fields (up to 4K bytes per entry)
- ▶ 4000 bytes per record (fixed length)
- ▶ 512K per record (variable length)*
- ▶ 10 database files in use simultaneously
- ▶ Faster operation—sorting, indexing and other file operations
- ▶ Enhanced report capability and mailing label generator
- ▶ On-line help system

*Will be limited by hardware configuration and operating system.

Framework

Framework is the all-in-one, innovative, personal productivity software your business needs. Word processing, spreadsheet, outlining, graphics, data management and telecommunications are all controlled by simple English-language commands. Now you can write letters, reports and memos; create budgets and financial models; organize your thoughts quickly; design charts and graphs; and handle files and records faster and easier than ever before. All because Framework thinks the way you do. Let us help you put the incredible power, speed and simplicity of Framework to work on your IBM PC or compatible system

for APPLE & IBM systems

Mouse Systems PC Mouse

PC Mouse is a small hand-held pointing and selection device used to move the cursor on your screen. Even if you are an expert typist, PC Mouse will increase your output with spreadsheets and word processors. And it's easy and quiet to use, being an optically driven system rather than a mechanical system. The PC Mouse is also compatible with all software written for the Microsoft Mouse.

List Price \$299.00 **\$179⁹⁵**

Accounting Partner II

STAR SOFTWARE SYSTEMS™

Star Software Systems introduces Accounting Partner II for the small businessman who needs to keep on top of his business. He needs a profit and loss statement every month. He needs to know if his customers are paying their bills. He needs to know when to pay his own bills. The Accounting Partner II does it all...in one package. Even if you are all thumbs around computers, you'll still be up and running in a single day. And it's compatible with almost any micro-computer on the market.

Kraft Joystick

Precision dual-mode gamesticks. It features the ability to function in two different modes: as a spring-return type joystick in which letting go of the stick causes it to return to the center of its axis or as a free floating type, in which the stick will remain in position if you let it go. The Kraft joysticks are tested for durability to over 1.5 million cycles, and carry a full one year warranty.

The hardest working software in the world

Lotus 1-2-3

With a personal computer, you can perform a lot of key business tasks. You can generate spreadsheets. Create graphs. Manage a wealth of information. And put your business in a more profitable position. But when you use 1-2-3 — the powerful, best-selling software package from Lotus — in your personal computer, you can do all these tasks at once. Without changing diskettes. Without re-entering data. And without waiting around.
