MOXA Software Installation Instructions

- **CD-ROM Software**

If your MOXA kit came with a CD-ROM instead of the "Device Driver" diskette, insert the CD-ROM and a blank floppy disk into the appropriate drives of your computer. From the Windows 95/98 "Start" menu, select "Run" and then "Browse". From the "Look in:" pop-down menu select "MOXA_SOFTWARE". Double-click on the "MAKEDISK.EXE" icon.

Once your diskette has been created, continue with the instructions in the Automation manual (Sec. 2.4 step #2, after the first sentence).

Here's an alternate method that just uses the CD-ROM.

1. Insert the MOXA CD-ROM
2. Open Windows Explorer
3. Press the "+" to the left of "MOXA_SOFTWARE"
4. Press the "+" to the left of "DRIVERS"
5. Double-click on the "WIN95" folder (this also works for Windows '98)
6. On the right side of the Explorer screen, double-click on the "INDUSTIO" folder.
7. Double-click on the "Setup95.EXE" icon
