Date of Purchase

Thank you for choosing a Browning Buck Mark 22.

Whichever model you purchased — the standard Buck Mark, Micro Buck Mark, Buck Mark 5.5, or Hi-Performance Buck Mark — it is certainly a gun you can be proud to own. The Buck Mark 22 is another in a long line of dependable, high quality Browning rimfire pistols. Each Buck Mark, .22 caliber, semi-automatic pistol uses a dependable blow-back action design with a removable magazine. John M. Browning invented his first semi-automatic pistol in 1894. The Buck Mark 22 has features that reflect the significant improvements and original ideas he contributed during more than 25 years of designing pistols. Since then, the Browning company has produced a variety of models designed for the sportsman and competitive target shooter. In every sense, the Buck Mark 22 is a true Browning. It gives you the kind of shooting enjoyment you’ve come to expect from the world’s most respected gun company.

With a reasonable amount of care, your Buck Mark 22 pistol should give you many years of dependable, enjoyable service. Please feel free to write us immediately if you have any observations regarding its performance and operation.

BUCK MARK 22 SEMI-AUTOMATIC .22 CALIBER PISTOL
You Are Responsible For Firearms Safety.

As a gun owner, you accept a set of demanding responsibilities. How seriously you take these responsibilities can be the difference between life and death.

**THERE IS NO EXCUSE FOR CARELESS OR ABUSIVE HANDLING OF ANY FIREARM. AT ALL TIMES HANDLE YOUR BUCK MARK 22 AND ANY OTHER FIREARM WITH INTENSE RESPECT FOR ITS POWER AND POTENTIAL DANGER.**

**PLEASE READ AND UNDERSTAND THE CAUTIONS AND PROPER HANDLING PROCEDURES OUTLINED IN THIS BOOKLET BEFORE USING YOUR NEW FIREARM.**

1. **ALWAYS KEEP THE MUZZLE OF YOUR BUCK MARK 22 POINTED IN A SAFE DIRECTION.**

   Never point any firearm at anything you do not intend to shoot. Be extremely alert and aware of all persons and property within the range of your ammunition.

2. **NEVER RELY TOTALLY ON YOUR FIREARM’S MECHANICAL “SAFETY” DEVICE.**

   The word “safety” describes a guns blocking or disengaging mechanism for the trigger, sear, hammer and/or firing pin. Although mechanical devices place your Buck Mark 22 pistol in a SAFER status, no guarantee can be made that the gun will not fire even if the “safety” is on the “on safe” position.

   **LIKE ANY MECHANICAL DEVICE, A “SAFETY” CAN SOMETIMES FAIL; IT CAN BE JARRED OR INADVERTENTLY MANIPULATED INTO AN UNSAFE CONDITION.**

   Mechanical “safeties” merely aid safe gun handling and are no excuse for pointing your guns muzzle in an unsafe direction.

   While it is a good idea to “test” your guns mechanical “safeties” periodically for proper function,

   **NEVER TEST IT WHILE YOUR GUN IS LOADED OR POINTED IN AN UNSAFE DIRECTION.**

   Safe gun handling does not stop with your guns mechanical “safety” devices — it starts there. Always treat this pistol with the respect due a loaded, ready-to-fire firearm.

3. **DO NOT CARRY YOUR BUCK MARK WITH A ROUND IN THE CHAMBER.**

   For good safety practice, it is recommended that a round not be chambered until immediately before your pistol is to be fired.

4. **WHENEVER YOU HANDLE YOUR BUCK MARK 22, OR HAND IT TO SOMEONE, MAKE SURE IT IS COMPLETELY UNLOADED.**

   To fully unload your Buck Mark, you must first remove the magazine, open and lock the slide rearward, and visually inspect the chamber to be certain it does not contain a cartridge. It is vital that you remove the magazine from your pistol so a cartridge is not automatically chambered when you close the action. Always keep the chamber empty and “safety” in the “on safe” position unless shooting is imminent (see page 7 & 11 for unloading procedures).

5. **DO NOT TRANSPORT YOUR BUCK MARK 22 LOADED.**

   Keep it unloaded, whether stored in a holster, gun case or other container.

6. **HUNTING FROM ELEVATED SURFACES SUCH AS TREE STANDS IS DANGEROUS,**

   and may increase the risk of handling a firearm. The following rules should always be observed by you and those you hunt with: Always make certain that the stand being used is safe and stable. Always make certain that your firearm is unloaded when it is being taken up and down from the stand. Always make certain that your firearm is not dropped from the stand, or dropped while it is being taken up or down from the stand. **Remember, a loaded firearm may discharge when dropped, even with the safety in the on safe position.**
BEWARE OF BARREL OBSTRUCTIONS.

When preparing to shoot your pistol, check for a barrel obstruction as follows: first fully unload the pistol by removing the magazine, locking the action open and inspecting the chamber. **BE CERTAIN NO LIVE ROUND IS IN THE CHAMBER.** Then glance down the barrel to be sure it is clear of any obstruction. It takes only one small obstruction to dangerously increase pressures. Before the first firing, clean the bore with a cleaning rod and patch, and wipe away any anti-rust compounds in the chamber and around the action.

**BE ALERT TO THE SIGNS OF AMMUNITION MALFUNCTION.**

If you detect an off sound or light recoil when a cartridge is fired, do not load another cartridge into the chamber. Fully unload by removing the magazine and removing the cartridge from the chamber. With the action open, glance down the barrel to make sure that an obstruction does not remain in the barrel. If there is an obstruction, completely clear the barrel before loading and firing again. Failure to follow these instructions can cause extensive damage to your gun and possible serious injury to yourself and others.

**BE CERTAIN YOUR PISTOL IS UNLOADED BEFORE CLEANING.**

Because so many gun accidents occur when a firearm is being cleaned, special and extreme care should be taken to be sure your gun is unloaded before disassembly, cleaning and reassembly. Keep ammunition away from the cleaning location. Never test the mechanical function of any firearm with live ammunition.

**ALWAYS UNLOAD YOUR PISTOL WHEN NOT IN USE.**

Your responsibilities do not end when your firearm is unattended. Store your pistol and ammunition separately and well beyond the reach of children. Take all safeguards to ensure your pistol does not become available to untrained, inexperienced or unwelcome hands.

**USE THE PROPER AMMUNITION.**

The barrel and action of this pistol have been made with substantial safety margins over the pressures developed by established American commercial loads.

**HOWEVER, BROWNING ASSUMES NO LIABILITY FOR ACCIDENTS WHICH OCCUR THROUGH THE USE OF CARTRIDGES OF NON-STANDARD DIMENSIONS OR THAT DEVELOP PressURES IN EXCESS OF COMMERCiALLY AVAILABLE AMMUNITION THAT HAS BEEN LOADED IN ACCORDANCE WITH STANDARDS ESTABLISHED BY THE SPORTING ARMS AND AMMUNITION MANUFACTURERS INSTITUTE (SAAMI).**

**EXAMINE EVERY CARTRIDGE YOU PUT IN YOUR BUCK MARK PISTOL.**

Your Buck Mark pistol is designed and chambered for 22 Long Rifle cartridges only. Browning cannot assume any responsibility for the use of unsafe or improper arms and ammunition combinations. It is your responsibility to read and heed all warnings in this instruction manual and on ammunition boxes.

**DISCHARGING FIREARMS IN POORLY VENTILATED AREAS, CLEANING FIREARMS, OR HANDLING AMMUNITION MAY RESULT IN EXPOSURE TO LEAD AND OTHER SUBSTANCES KNOWN TO CAUSE BIRTH DEFECTS, REPRODUCTIVE HARM AND OTHER SERIOUS PHYSICAL INJURY. HAVE ADEQUATE VENTILATION AT ALL TIMES, WASH HANDS THOROUGHLY AFTER EXPOSURE.**

**DO NOT SNAP THE FIRING PIN ON AN EMPTY CHAMBER — THE CHAMBER MAY NOT BE EMPTY!**

Treat every gun with the respect due a loaded gun, even though you are certain the gun is unloaded.

**KEEP YOUR FINGER AWAY FROM THE TRIGGER WHILE UNLOADING AND LOADING — UNTIL YOU ARE READY TO SHOOT.**

**BE SURE OF YOUR TARGET AND BACKSTOP.**

Take additional care during low light periods. Know the range of your ammunition. Never shoot at water or hard objects.

**DROPPING YOUR BUCK MARK 22 WHEN LOADED CAN CAUSE AN ACCIDENTAL DISCHARGE EVEN WITH THE “SAFETY” ON.**

Be extremely careful while hunting or during any shooting activity, to avoid dropping a loaded firearm.
ALWAYS COMPLETELY UNLOAD YOUR PISTOL’S CHAMBER BEFORE CROSSING A FENCE, CLIMBING A TREE, JUMPING A DITCH OR NEGOTIATING OTHER OBSTACLES.

Never place your Buck Mark 22 on a car, or on any unstable object.

IF YOUR BUCK MARK 22 FAILS TO FIRE, KEEP THE MUZZLE POINTED IN A SAFE DIRECTION.

Hold this position for a minimum of 30 seconds. Carefully open the action and remove the cartridge. If the rim is indented, the cartridge should be disposed of in a way that cannot cause harm. If the rim is not indented, your firearm should be examined by a qualified gunsmith and the cause of the malfunction should be corrected before further use.

WEAR EYE AND EAR PROTECTION WHEN SHOOTING.

Unprotected, repeated exposure to gunfire can cause hearing damage. Wear hearing protectors (shooting ear plugs or muffs) to guard against such damage. Wear shooting glasses to protect your eyes from flying particles. Always keep a safe distance between the muzzle of your firearm and any persons nearby, as muzzle blast, debris and ejecting shells could inflict serious injury. Also, wear eye protection when disassembling and cleaning your pistol to prevent the possibility of springs, spring-tensioned parts, solvents or other agents from contacting your eyes.

BE DEFENSIVE AND ON GUARD AGAINST UNSAFE GUN HANDLING AROUND YOU AND OTHERS.

Don’t be timid when it comes to gun safety. If you observe other shooters violating any of these safety precautions, politely suggest safer handling practices.

SUPERVISE AND TEACH FIREARMS SAFETY TO ALL MEMBERS OF YOUR FAMILY.

This is especially important when children and nonshooters are involved. Closely supervise newcomers to the shooting sports. Encourage enrollment in hunting/shooting safety courses.

NEVER DRINK ALCOHOLIC BEVERAGES OR TAKE ANY TYPE OF DRUGS BEFORE OR DURING SHOOTING.

Your vision and judgment could be dangerously impaired, making your gun handling unsafe to you or to others.

PERIODIC MAINTENANCE — AVOID UNAUTHORIZED SERVICING.

Your Buck Mark 22 is a mechanical device which will not last forever, and as such, is subject to wear and requires periodic inspection, adjustment, and service. Like all Browning firearms, your Buck Mark 22 should be serviced by a Browning Recommended Service Center or by Browning’s service facility in Arnold, Missouri.

BROWNING CANNOT_ASSUME ANY RESPONSIBILITY FOR INJURIES SUFFERED OR CAUSED BY UNAUTHORIZED SERVICING, ALTERATIONS OR MODIFICATIONS OF BROWNING FIREARMS.

Read and heed all warnings in this instruction book, on ammunition boxes and with all accessories that you install on your firearm. It is your responsibility to secure the most up-to-date information on the safe handling procedures for your Browning gun. Browning assumes no liability for incidents which occur when unsafe or improper gun accessories or ammunition combinations are used.

DO NOT, UNDER ANY CIRCUMSTANCE, ALTER THE TRIGGER, SAFETY OR PARTS OF THE FIRING MECHANISM OF THIS OR ANY OTHER FIREARM. FAILURE TO OBEY THIS WARNING MAY RESULT IN INJURY OR DEATH TO YOURSELF OR OTHERS.

BE CAREFUL!
Nomenclature

In conventional gun terminology, the position and movement of pistol parts are described as they occur with the pistol horizontal and in normal firing position; i.e. the muzzle is forward or front; the pistol grip is rearward or rear; the trigger is downward or underneath; the sights are upward or on top. For general nomenclature refer to Figure 1-A and 1-B. General functions and procedures are illustrated using the standard Buck Mark pistol. Procedures unique to an individual model are illustrated separately.
Serial Number
The serial number of your Buck Mark 22 pistol can be found stamped on the left side of the pistol, in front of the trigger guard.

General Operation
Your new Browning is a blow-back operated, semi-automatic pistol. With the chamber and magazine loaded and the safety in the off safe or fire position, the pistol will fire a single round with each successive pull of the trigger until the magazine and chamber are empty. The slide of the pistol is designed to stay open after the last cartridge has been fired.

Safety
The Buck Mark 22 incorporates a thumb operated sear block “safety.” To put the mechanism “on safe” the slide must be fully forward with the hammer cocked. The thumb safety lever is then pressed into the recess provided for it in the slide (See Figure 2). Note: this may require firm pressure. Be sure the lever travels its maximum upward movement and is completely engaged in the recess. Although the sear is now blocked, abusive handling such as a sharp blow could dislodge the hammer or otherwise cause the firing pin to move forward and discharge a cartridge.

Slide Stop Open Latch
When the slide is drawn rearward, the stop open latch can be raised to lock the slide in its open position. With a magazine loaded into the frame, this latch is automatically actuated to lock the slide after the last shot is fired (See Figure 3).

Removing the Magazine
To remove the magazine simply push the magazine release button located on the left side of the frame, behind the trigger. This releases the magazine which can be caught with the other hand and extracted (See Figure 4).

Loading and Firing
1 At all times while loading, BE CERTAIN THE MUZZLE IS POINTED IN A SAFE DIRECTION. With the slide locked to the rear, using the stop open latch, and with the magazine out of the gun, inspect the chamber to be sure it is empty (See Figure 5). Close the slide and place the manual thumb “safety” in the “on safe” position.
2 Depress the magazine’s follower button with the thumb of one hand while inserting the cartridges with the other hand (See Figure 6). Insert the loaded magazine into the pistol, being certain that the magazine is pressed completely in and is being retained by the magazine latch.

3 To load the chamber, move the manual thumb “safety” lever down into the “off safe” position and pull the slide completely back. Release the slide. It will move forward under spring pressure and feed the first cartridge from the magazine into the chamber (See Figure 7).

THE PISTOL IS NOW READY FOR FIRING.

4 After pulling the trigger and firing the cartridge, the pistol automatically ejects the fired cartridge and feeds a fresh cartridge from the magazine into the chamber ready for a second shot. Thus the shooter may fire the pistol until the magazine is empty, merely by pulling the trigger for each shot. After the last shot is fired, the stop open latch automatically holds the slide in its open or rearward position.

5 During reloading, it is recommended that you remove the empty magazine, inspect the chamber to be sure it is empty, then close the slide and place the manual thumb “safety” in the “on safe” position. By inserting the loaded magazine with the slide closed, there is no danger of inadvertently tripping the stop open latch and feeding a live cartridge into the chamber from the magazine.

CAUTION: You will have observed by cocking the pistol that the slide moves rearward about one inch past the rear of the frame. In shooting, neither hand should be in a position where it could be hit by the slide in its rearward movement.

DO NOT USE UNORTHODOX SIGHTING METHODS WHERE THE PISTOL IS HELD CLOSE TO THE EYE.

Single Shot Loading and Shooting

If you should wish to teach a newcomer to the sport how to shoot with this pistol, we recommend single shot loading during training. However, do not load the single round directly into the chamber. The recommended procedure is:

1 Remove the magazine from the pistol.
2 Inspect the chamber to see if it is empty.
3 Close the slide and place the manual thumb “safety” in the “on safe” position.
4 Load a single round into the magazine.
5 Insert the magazine into the pistol.
6 When shooting is desired, place the manual thumb “safety” in the “off safe” position.
7 With the finger away from the trigger, cycle the slide, feeding the single round from the magazine to the chamber.

8 THE PISTOL IS NOW READY FOR FIRING.

* Indicates part must be fitted by Browning Service Department or qualified gunsmith.
**Unloading**

To remove the cartridge remaining in the chamber, be certain the muzzle is pointed in a safe direction, raise the thumb “safety” lever to its “on safe” position, press the magazine release button and withdraw the magazine from the pistol. Then move the “safety” to the “off safe” position and slowly pull rearward on the slide to extract and eject the cartridge from the chamber.

**Sight Adjustment**

**Buck Mark & Micro Buck Mark**

All Buck Mark pistols are equipped with Browning Pro Target Sights. These precision rear sights are screw adjustable with 16 clicks per revolution on both the elevation and windage screw.

When performing all sight adjustment procedures, **MAKE SURE YOUR PISTOL IS FULLY UNLOADED.**

Remove the magazine, check the chamber and point the muzzle in a safe direction.

**Windage** — To move the point of impact to the right, turn the screw located on the right side of the sight in a clockwise direction (See Figure 8).

**Elevation** — To raise the point of impact, turn the elevation screw, located just forward of the rear sight notch, in a counterclockwise direction. To lower the point of impact, turn the elevation screw in a clockwise direction (see Figure 9).

---

**Sight Adjustment**

**Silhouette & Target 5.5 Models**

When performing all sight adjustment procedures **MAKE SURE YOUR PISTOL IS FULLY UNLOADED.**

Remove the magazine, and check the chamber for cartridges. Always point the muzzle in a safe direction during actual adjustments.

The Silhouette and Target 5.5 also have a fully adjustable Browning Pro Target rear sight with an adjustable front post sight. Both front and rear sights are hooded. To adjust the sights it is not necessary to remove the front and rear sight hoods.

**Front Sight Adjustments** — The front blade can be adjusted for elevation and for width to accommodate more precise sight settings and different stances.
**Figure 10**

**BLADE WIDTH**— To increase or decrease the width of the blade, loosen the front set screw found on the front of the top sight rib (above the muzzle) with the 1/16" Allen wrench (supplied). Insert the slotted front sight adjusting wrench (supplied) into the access hole at the top of the sight hood and rotate the blade up to 90 degrees, to the desired width (See Figure 10). Retighten the set screw with the allen wrench.

**Figure 11**

**Sight Adjustment Varmint Model**

The Varmint Model comes ready to accept scope mounts and a scope. The grooves on the rib are designed to fit mounts with a full-width attaching screw. Adjust your scope or optical sight according to the instructions contained with your scope.

---

**Disassembly Buck Mark & Buck Mark Plus Models**

**CAUTION: WEAR EYE PROTECTION WHEN DISASSEMBLING AND CLEANING YOUR PISTOL TO PREVENT THE POSSIBILITY OF SPRINGS, SPRING-TENSIONED PARTS, SOLVENTS OR OTHER AGENTS FROM CONTACTING YOUR EYES.**

**BE CERTAIN YOUR PISTOL IS UNLOADED. REMOVE THE MAGAZINE AND INSPECT THE CHAMBER. KEEP THE MUZZLE POINTED IN A SAFE DIRECTION.**

1. Be certain the muzzle is pointed in a safe direction. Remove the magazine. Draw the slide rearward and lock open with the stop open latch. Visually inspect the chamber to be certain it is empty. Release the stop open latch and allow the slide to close.

2. Remove the two sight base screws and lift the sight base — with sight attached — from the frame. Be careful not to lose the two lockwashers (See Figure 11).
Figure 12

CAUTION: WHEN REINSTALLING THE REAR SIGHT BASE SCREWS MAKE CERTAIN TO REPLACE THE LOCKWASHERS. ALWAYS USE THE SIGHT BASE SCREW LOCKWASHERS SUPPLIED WITH YOUR PISTOL. IF LOST, ORDER NEW LOCKWASHERS FROM BROWNING. FAILURE TO USE A BROWNING SIGHT BASE SCREW LOCKWASHER MAY MAKE IT VERY DIFFICULT TO REMOVE THE REAR SIGHT SCREW.

Figure 13

Disassembly
Silhouette, Varmint & Target 5.5 models

Disassembly of the Silhouette, Varmint and Target 5.5 models is identical to the regular Buck Mark with a few minor exceptions.

3 Pull the slide back approximately one inch and lift the recoil rod upward from the slide (See Figure 13). The buffer will usually remain in place in the slide in front of the recoil post; however, it may stay affixed to the end of the recoil rod. In either case, remove the rod and set aside for cleaning.

4 Lift the slide from the frame. This is sufficient disassembly for all practical cleaning and lubrication required (See Figure 14 for fully disassembled Standard Buck Mark). Further disassembly should be performed only by a competent gunsmith or the Browning service facility. Do not remove the grips from the pistol, as they serve to retain and position internal parts.
1. First, remove the forearm (Silhouette Models only). To do this, unscrew the forearm screw located on the bottom of the forearm, in the center. Lift the forearm away from the barrel.

2. Remove the rear sight base screw located behind the rear sight (See Figure 14). On Silhouette and Target 5.5 models the sight hood may have to be removed by inserting your index finger inside the hood and pulling up and outward on one side of the hood until it comes off. (Replace in reverse order.)

**CAUTION: WHEN REINSTALLING THE REAR SIGHT BASE SCREW MAKE CERTAIN TO REPLACE THE LOCKWASHER. ALWAYS USE THE SIGHT BASE SCREW LOCKWASHER SUPPLIED WITH YOUR PISTOL. IF LOST, ORDER A NEW LOCKWASHER FROM BROWNING. FAILURE TO USE A BROWNING SIGHT BASE SCREW LOCKWASHER MAY MAKE IT VERY DIFFICULT TO REMOVE THE REAR SIGHT BASE SCREW.**

3. Loosen the barrel mounting screw — found below the barrel, at the front of the frame — approximately 2 1/2 turns (See Figure 15).

4. To remove the barrel, pull the slide back about 1/2”. Then pivot the barrel down and lift the barrel off of the frame (See Figure 16). Set the barrel aside.

5. Remove the recoil spring and slide. To do this pull the slide back approximately one inch and lift the recoil rod upward from the slide. The buffer will usually remain in place in the slide, in front of the recoil post; however, it may stay affixed to the end of the recoil rod. In either case, remove the rod and set it aside for cleaning (See Figure 12.)

6. Lift the slide from the frame. This is sufficient disassembly for all practical cleaning and lubrication required. Further disassembly should be performed only by a competent gunsmith or a Browning service facility.

Do not remove the grips from the pistol, as they serve to retain and position internal parts.
Reassembly
Buck Mark & Buck Mark Plus Models

1. Make sure the buffer is in place on the recoil post. The circular projection of the buffer faces rearward to match its opposing recess in the recoil post. The hole in the buffer should be on top (See Figure 17).

2. Replace the slide on the frame.

3. Insert the rear end (pointed) of the recoil rod through the hole in the buffer, and into the hole on the recoil post (See Figure 18).

4. Slide the recoil guide back slightly (compressing the spring less than 1/8") until the recoil guide can be pushed down into the recoil guide recess in the slide. Make sure that the two beveled edges are upward (See Figure 19).

5. Align the lockwashers over the screw holes in the sight base.

ALWAYS USE THE SIGHT BASE SCREW LOCK WASHER SUPPLIED WITH YOUR PISTOL. FAILURE TO USE A BROWNING SIGHT BASE SCREW LOCK WASHER MAY MAKE IT VERY DIFFICULT TO REMOVE THE REAR SIGHT BASE SCREW.

6. Position the rear sight in place and install the screws. (The rear sight base screw is the longer of the two.)

7. Check all screws to make sure they are tight.

Reassembly
Silhouette, Varmint & Target 5.5 Models

1. Make sure the buffer is in place on the recoil post. The circular projection of the buffer faces rearward to match its opposing recess in the recoil post. The hole in the buffer should be on top (See Figure 17).

2. Replace the slide on the frame.

3. Insert the rear end (pointed) of the recoil rod through the hole in the buffer, and into the hole on the recoil post (See Figure 18).

4. Slide the recoil guide back slightly (compressing the spring less than 1/8") until the recoil guide can be pushed down into the recoil guide recess in the slide. Make sure that the two beveled edges are upward (See Figure 19).

5. Pull the slide rearward about 1/2". At the same time “tip” the barrel tang into the tang recess in the frame (See Figure 20). Pivot the barrel up, and the rear of the
3 Clean the barrel using a pistol cleaning rod with a tip and a patch made for 22 caliber pistols. Depending on the amount of use, the barrel may need to be cleaned with a good quality micro solvent. Ordinarily a light lubricating oil will suffice for this purpose.

4 Use a small brush to remove dirt or other foreign matter from the other parts of the action. Lightly lubricate all moving parts with a good, light gun oil. Use oil sparingly; a very light film is sufficient. Browning Gun Oil is ideally suited for this purpose.

5 Frequently inspect your pistol and magazine to determine a need for cleaning. Normally, the magazine should be cleaned at least after every 500 to 1000 rounds. This assures the best operation since a certain amount of lubricant and dirt will gradually collect in the mechanism. Place the magazine in a good gun cleaning solvent and agitate to loosen and remove dirt and grease. While the magazine is still submerged, cycle the magazine follower back and forth a few times. Shake all excess solvent from the magazine and dry with a cloth, or preferably blow clean with air pressure, if available.

CAUTION: MOST SOLVENTS ARE HIGHLY FLAMMABLE. APPROPRIATE SAFETY MEASURES SHOULD BE PRACTICED WHEN WORKING WITH SOLVENTS.

ALWAYS USE THE SIGHT BASE SCREW LOCK WASHER SUPPLIED WITH YOUR PISTOL. FAILURE TO USE A BROWNING SIGHT BASE SCREW LOCK WASHER MAY MAKE IT VERY DIFFICULT TO REMOVE THE REAR SIGHT BASE SCREW.

9 Replace the forearm on the barrel (Silhouette and Target 5.5 only).

Cleaning Suggestions
WEAR EYE PROTECTION WHEN DISASSEMBLING AND CLEANING YOUR PISTOL.

1 Disassemble the pistol as previously described in the section titled “Disassembly” on page 13.

2 The slide assembly may be cleaned with any good cleaning solvent or light oil and then dried with a clean cloth, or preferably blown clean with air pressure, if available. Be sure to wear eye protection whenever cleaning your pistol.

### Service or Repair

If your firearm should require service or repairs, we suggest you first contact a local recommended Browning Firearms Service Center. Contact our Browning sporting goods dealer or call our Service Department for the address of the Service Center nearest you. Otherwise, you may send your firearm directly to our own Service Department. For technical questions about your firearm or service call our Service Department.

**Browning Service Department**
**One Browning Place**
**Arnold, Missouri 63010-9406**
**Phone: 1-800-322-4626**

Canadian Customers call or write:
**Browning Canada Sports Ltd./Ltee,**
**5617 Chemin St-François**
**St-Laurent, Quebec H4S 1W6**
**Phone: (514) 333-7261**

When returning your firearm for servicing, you must do the following:

a. Be sure it is completely unloaded.

b. Package it securely in a cardboard container.

c. Enclose a letter with your firearm that clearly describes the trouble experienced and the repairs or alterations desired.

d. If convenient, send a copy of the letter to us separately.

e. Never return ammunition with your firearm. It is against postal and most commerce regulations.

If you have any questions about this manual or about any other Browning products, call or write our Consumer Information Department:

**Browning Consumer Information**
**One Browning Place**
**Morgan, Utah 84050-9326**
**Phone: (801) 876-2711**
