PUMP ACTION SHOTGUN
WARNING AND INSTRUCTION MANUAL
PLEASE READ THESE INSTRUCTIONS

MODEL NUMBER BARREL LENGTH CALIBERS FINISH TYPE
MP 133 20",24",26",28" 12GA / 3.5" BLUE
PUMP ACTION

GENERAL INFORMATION:

Weight (average) - 20" = 5.9 LBS., 28" = 6.7 LBS.
Overall Length - 40" TO 48"
Capacity - 4 + 1 @ 12ga / 3.5"

FOR YOUR SAFETY AND THE SAFETY OF OTHERS, this owner’s manual contains important warnings and safety procedures which must be understood BEFORE using this firearm. Read the entire manual and if you do not understand any part it or the operation of your shotgun, stop and seek professional firearms instructions. You can get a copy of this manual from European American Armory Corp. on request.

Record the serial number of your Air Rifle:
# ______________________________________________________________

and a description of it:
_______________________________________________________________

Make a copy of this manual, proof of purchase/sales record for safekeeping in a secure safe or fireproof container. Such proof is necessary if the firearm is stolen or for warranty repair. Before handling any firearm, make sure you know the safety procedures and most importantly, keep the firearm pointed in a safe direction.

WARNING

**YOU RISK INJURY OR DEATH BY HANDLING THIS FIREARM**

Before handling this firearm, read, understand and follow the instructions in this manual. Always keep this manual with the firearm. If you lend, give or sell this firearm, be sure the manual goes with it. If there is anything you do not understand, seek advice from someone qualified in safe handling of firearms.

WARNING

*This firearm should always be transported unloaded in its case.*
TYPE OF AMMUNITION TO BE USED
It is suggested that high quality commercially manufactured ammunition be used in this firearm. Some factory ammunition works better than others and you should stick with the brand you find works well in your shotgun. Avoid military surplus or hot loaded ammo. The use of reloaded, high pressure or hand loaded ammunition will void the warranty.

NOTICE
SHOTGUNS ARE CLASSIFIED AS FIREARMS OR DANGEROUS WEAPONS and are sold by European American Armory Corporation with the specific understanding that we are not responsible in any manner whatsoever for their safe handling or resale under local laws and regulations.

European American Armory shall not be responsible in any manner whatsoever for malfunctioning of the firearm, for physical injury or for property damage resulting in whole or in part from (1) intentional or negligent discharge, (2) improper or careless handling, (3) unauthorized modifications and/or alteration to the internal/safety mechanisms, (4) defective, improper, high pressure, hand-loaded, or reloaded ammunition, (5) corrosion and/or lack of proper maintenance (6) neglect, or (7) other influences beyond our direct and immediate control. This limitation applies regardless of whether liability is asserted on the basis of contract, negligence or strict liability (including any failure to warn). Under no circumstance shall European American Armory Corporation be liable for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits.

SAFETY PROCEDURES
1. We recommend that you get competent firearms instruction in safe handling before using this firearm. Please ask your dealer. All guns are extremely dangerous if carelessly handled or used. Remember that the firearm user is the primary “safety” and to depend on any mechanical devices is to be only half safe.

2. This firearm will fire if a cartridge is in the chamber and the trigger is pulled and the safety is disengaged.

3. DO NOT LOAD THIS SHOTGUN UNTIL YOU UNDERSTAND HOW THIS SHOTGUN OPERATES. KEEP this shotgun unloaded at all times except when ready to fire and you are sure of your target.

4. ALWAYS carry this shotgun in a case or original box unloaded.

5. NEVER point this shotgun at anything that is not your intended target even if this shotgun is unloaded. When loading, cleaning, unloading or handling, always be sure the muzzle is pointed in a safe direction and always keep your finger off the trigger.

6. NEVER assume any gun is unloaded. Before handling, check to make sure the chamber is empty. See unloading Instructions and then unload any am-
munition. Make sure you know that this or any firearm is fully unloaded before displaying or handling it. When handling any firearm, keep your fingers away from the trigger at all times until you intend to fire.

7. **WARNING:** The actual firearm does not contain any lead; however, it does fire ammunition containing lead or lead compounds known to the State of California to cause cancer, birth defects, reproductive toxicity, and other serious physical injury. Those who discharge a firearm, stand near someone who discharges a firearm or cleans firearms are hereby warned of the dangers presented by lead and lead compounds and should take protective health measures. Avoid exposure to lead while handling and wash your hands after contact. Proper air ventilation is absolutely necessary when shooting indoors.

**A M M U N I T I O N   W A R N I N G**
Old, Hot-loaded and/or re-loaded ammunition may be dangerous. Because of the poor or nonexistent quality control standards among some companies or people who make reloaded ammunition and the dangers of overloads and under loads (squib loads) which may occur, we recommend that only good quality new factory ammunition be fired in our firearms. [If you prepare your own hand loads, do NOT exceed recommended pressures in line with those generated by standard factory loads as manufactured by Remington, Winchester, Federal, PMC or other reputable companies.] Old ammunition may not fire with sufficient force to expel the projectile from the barrel.

**R E A D I N G  T H E S E  S A F E T Y  R U L E S  W I L L  S A V E  Y O U R**
**L I F E  O R  T H E  L I F E  O F  S O M E O N E  E L S E**
Get instructions from a competent firearms instructor before using this or any firearm. Learn from a professional how to handle, load, unload, operate, fire and care for your gun.

NEVER PLAY with your firearm. It is not a toy and can be a very dangerous weapon that can cause serious personal injury or death.

Always keep the gun pointed in a safe direction. Treat every gun as if it is loaded...all the time. NEVER point any firearm (loaded or unloaded) at any person or anything you do not intend to shoot. Always keep your gun unloaded until ready to use and make sure that it is unloaded before cleaning.

Keep your finger OFF the trigger until you are actually aiming at the target and ready to shoot. Learn to rest your finger outside of the trigger guard.

Never rely on a gun’s “safety” to protect you from unsafe gun handling. A safety is only a mechanical device, not a substitute for common sense and gun safety procedures.

Never leave a gun unattended or where it could fall and fire.

Store guns and ammunition separately **beyond the reach of children.** Make sure that they are properly secured so untrained individuals and children will be denied access to your guns and ammo.
Test your gun’s operation and safeties only at a shooting range while the firearm is pointed in a safe direction.

Know your target and what is beyond. Ask yourself what your bullet will hit if it misses the target or passes through the intended target. Remember, a fired projectile can travel over a mile (including a ricochet) and is capable of going through walls.

Guns and alcohol or drugs do not mix. Don’t take any alcoholic beverages and/or drugs before or during shooting activities.

Never pull a gun toward you by the muzzle. Don’t climb a tree, cross a ditch or fence with a loaded gun.

Always empty guns before entering a house, car, truck, boat, RV, camp or any building.

When receiving a gun, always open the bolt and check to make sure the chamber is unloaded.

NEVER accept anyone’s word that a gun is “unloaded” or “empty”. You should immediately open the action and check to make sure it is unloaded.

Be careful with ALL ammunition. Even “blank” cartridges are deadly at close range due to the muzzle blast. Make sure your ammunition is in new and in good clean condition. Do NOT oil or grease ammo as this may damage the cartridge primer. Do NOT tamper with or alter the standard factory ammunition.

Keep firearms unloaded when not actually in use. Load the gun only when on the range preparing to fire and unload it before leaving the range.

Never put your hand over the muzzle of a gun.

ALWAYS WEAR protective shooting glasses and hearing protection when using firearms.

Spectators should be at least 10 feet behind and away from the shooter while the shooter is loading, shooting and unloading. Spectators should wear protection for hearing and sight loss and they should avoid distracting those shooting their firearms.

Never drop your gun. If you do drop it, unload it and check it for proper function before using it again.

Do NOT alter or modify your gun. Don’t try to change your gun’s trigger pull, because it may affect sear engagement and thereby cause accidental firing.

Do NOT remove any internal safety or safety device on the firearm. Safety mechanisms are designed to protect you from injury or death.

Do maintain and keep your gun clean. Keep in a dry place away from other metals and water. If your gun shows sign of corrosion or improper operation, have it serviced by a competent gunsmith.

Keep the muzzle pointed in a safe direction when loading and unloading your gun. Never point the muzzle at anyone.
Never shoot at hard flat surfaces or water....bullets ricochet.

If a gun fails to fire when the trigger is pulled, keep it pointed down range at the target for 60 seconds. Sometimes slow primer ignition will cause a “hang fire” and the cartridge will go off after a short pause. If it still fails to fire, keep muzzle pointed in safe direction and avoid exposure to the breech, as you attempt to unload your firearm.

Never let water, snow, mud or other material enter the barrel. Always be sure the barrel is free of any obstruction.

Since many ammunition identifications sound similar, be sure that you use only the correct ammunition for your gun. Do NOT use the wrong size or wrong strength ammunition in your firearm.

Repeated and prolonged exposure to gunfire may cause toxic levels of lead in your body. High levels of lead in the blood may result cancer, impotency, birth defects and other serious physical injury. When shooting indoors, make sure there is proper fresh air ventilation.

Teach children: 1. NOT to touch guns, bullets, cartridges, shells, flares or any explosive device and 2. If they discovery such a dangerous item or weapon, they must immediately report its location to their parents, school teacher and police.

Remember a firearm has the capability of taking your life or the life of someone else. Be careful with your firearm -- an accident is almost always the result of not following basic safety rules.

HOME SAFETY IS PROBABLY YOUR BIGGEST CONCERN. We suggest a gun lock such as Master Gun Locks. They work on most firearms and are available in gun shops and sporting goods departments. For more information write: Master Gun Locks; Master Lock Company, P.O. Box 10367, Milwau-kee. WI 53210. You have invested this much in your new firearm, now invest a little more in your family’s safety.

USED FIREARMS - If you got your European American Armory firearm as a used gun, BEFORE USING IT you should unload it and check all its functions to be sure it works correctly. Firearms are some times altered to work incor-rectly, or parts may be removed, lost or replaced with incorrect parts. First, unload it and check it yourself and then take it to a good gunsmith who knows European American Armory firearms, and have him examine it.

WRITE US concerning any items or circumstances which you don’t understand and which might relate to your safety and the operation of your firearm.

**WARNING**

BEFORE LOADING or firing a shotgun, examine the bore and the firing cham-ber to be certain they are clean and free of any obstruction. Even a heavy coat of oil, grease, snow or water may result in damage to the firearm and injury to the shooter and/or persons near the firearm. A misfire or unusual sound upon firing is a signal to cease firing and to examine the chamber and bore. If there is any obstruction, clear the obstruction and clean the bore and chamber before firing.
FIRING WARNING
When shooting, full eye and ear protection is mandatory at all times. Shooters and spectators must wear shooting glasses and sound suppressor to prevent eye injury and hearing loss. Vision loss and hearing impairment can occur with only one moment of non-protection.

WARNING
Any bore obstruction, even if it is only partly blocked, may cause the gun to blow up if it is fired, or may cause damage to the gun such as a bulged barrel. To avoid injury or death to the shooter or bystanders, check the barrel before shooting or if a shot does not sound normal.

WARNING
Always keep the muzzle pointed in a safe direction! Never attempt to load or unload any firearm inside a vehicle, building or other confined space (except a properly constructed shooting range). Enclosed areas frequently offer no completely safe direction in which to point the firearm. If an accidental discharge occurs, there is great risk of injury or property damage. Before loading, always clean all, grease and oil from the bore and chamber, and check to be certain that no obstruction is in the barrel. Any foreign matter in the barrel could result in a bulged or burst barrel or other damage to the firearm and could cause serious injury to the shooter or to others.

WARNING
If there is any reason to suspect that a bullet or projectile is obstructing the barrel, immediately unload the firearm (See Unloading Instructions) and check the chamber and the bore. A shot or slug may be lodged some distance down the barrel where it can not easily be seen. Check the bore by using a cleaning rod to pass through the barrel. If a blockage is in the bore, DO NOT ATTEMPT TO SHOOT IT OUT WITH ANOTHER CARTRIDGE, OR BLOW IT OUT WITH A BLANK CARTRIDGE OR A CARTRIDGE FROM WHICH THE BULLET HAS BEEN REMOVED. SUCH TECHNIQUE(S) CAN GENERATE EXCESSIVE PRESSURE, DAMAGE THE FIREARM AND CAUSE SERIOUS PERSONAL INJURY. If the blockage can be removed with a cleaning rod, clean any unburned powder grains from the bore, chambers & mechanism before resuming shooting. If the blockage can not be dislodged by tapping it with a cleaning rod, take the firearm to a gunsmith.

WARNING (Mechanical Malfunctions)
STOP SHOOTING IMMEDIATELY AND UNLOAD YOUR FIREARM if your firearm develops: a mechanical malfunction; binding or stoppage; spitting powder/gas; a cartridge primer is punctured; a cartridge case is bulged or ruptured; or the sound on firing does not sound quite right. Do NOT try one more shot but unload your firearm and take it and the ammunition to a qualified gunsmith or send it back to EAA for examination. Do not assume that the shotgun is empty merely because you checked the chamber. You must also check the bore for any fired shot or wad jammed inside the barrel.
EXTERNAL CONTROL PARTS:

Cross Trigger Block Safety: Located on trigger housing behind trigger, push button style. When red ring is exposed shotgun will fire if trigger is pulled!! Do not disengage safety unless you are ready to fire shotgun. (Safety Engaged - The red ring is not showing and the trigger is blocked from full travel; Safety Disengaged - The red ring is showing and the trigger has full travel...MAKE SURE YOU UNDERSTAND HOW THE SAFETY WORKS BEFORE YOU LOAD OR USE THE SHOTGUN)

Trigger: Located in the trigger guard with safety disengaged and chambered loaded and the trigger pulled to the rear, shotgun will discharge.

Forearm / Slide: Located under barrel in front of the receiver. Moves rearward to remove spent or empty cartridge cases or to un-chamber a live round that has not been fired or to extract a round from the magazine … Forearm / slide moves forward to pick up a live cartridge from the carrier and push it into the firing chamber.

Action Unlock Button: When pushed up will allow the opening of the slide for quick inspection or unloading of the chamber.

Carrier Release Button: When pushed in releases carrier for unloading and loading of mag tube as well as allowing the bolt to move to the forward position after all the rounds have been fired or allowing the bolt to slide back when the gun is empty so as to extract a cartridge. Note: This shotgun locks the bolt back on the ejection of the last round.

Magazine Tube: Screws onto the end of receiver and holds the cartridges for feeding into the receiver. Warning the magazine the magazine cap is under spring pressure. Note: After assembly of the shotgun the spring in the magazine tube may become twisted. This will cause a decrease in magazine tube capacity. If you load and unload the magazine tube the spring will untwist and the capacity should be as defined in the manual.
Magazine Tube Extension: Increases the Magazine tube capacity to hold 4 rds of 3.5” 12ga

Internal Choke Tubes: Screw type internal, For accessory choke tubes call “Colonial Arms Co” Selma, Al. 36702 at 334-872-9540.

DIRECTION FOR ASSEMBLY
The MP133 comes with the barrel separated from the receiver for transit reasons. You will need to install the barrel to the receiver. A) To do this you will remove the receiver and stock and forearm / slide assembly from the box and remove the protective wrapping. B) Then you will remove the magazine tube cap / extension. C) Then slide the slide / forearm assemble to the middle of the slide path so that the bolt is mid way in the ejection port window, Now remove protective wrapping from the barrel and (D) inset the barrel (barrel extension end into the receiver and slide the forend / slide back as required so that the barrel fully enters the receiver and the barrel magazine support aligns and goes around the magazine tube. Now reinstall the magazine tube cap / extension. Have your firearms dealer show you how to do this the first time and always make sure the magazine tube cap / extension is completely tighten down. See Fig (A, B, C, D)

LOCKING BLOCK PLACEMENT:
During assembly or reassembly make sure the locking lug is place as pictured (Fig B). Make sure that the firing pin and firing pin washer are held rearward by the locking lug (Fig B1).

Screw in Chokes Symbols / Markings
The end of the chokes are marked with slashes to determine choke

///// - Extra Full / - Full
// - Improved Modified /// - Modified
/// - Improved Cylinder Cl - Cylinder

BEFORE INSTALLATION OF A CHOKE TUBE MAKE SURE THE SHOTGUN IS UNLOADED.

The chokes are right hand thread. Make sure that you do not cross thread the choke. For tightening of a choke tube use a special wrench which completes your shotgun.

WARNING! MAKE SURE YOU FULLY TIGHTEN THE CHOKE TUBE
Shooting with loosed choke tube can cause its damage or damage of your shotgun.
Look into the muzzle. The ring at the surface of the barrel bore overhangs the surface of the choke tube and should be visible. The distortion of the ring may indicate the damage of the choke tube or housing in the barrel.

PERIODICALLY, CHECK TO INSURE THE TUBE IS FULLY SEATED IN THE BARREL.

After use remove the choke tube and clean the choke tube threads and location in the barrel where the choke tube thread into. Only use choke tube lube for lubrication. Only use IC choke tube with slug.

REMEMBER the choke tubes and the location in the barrel need careful handling for prevention of casual deformation at the thin-wall sections. Needlessly do not leave a barrel without a choke tube being in place.

If you would like to buy extra choke tubes (skeet, trap, extra full, etc.) call; Colonial @ 1-800-949-8088

DIRECTION FOR DISASSEMBLY

Make sure the gun is unloaded and pointed in a safe direction. Make sure the safety is on. There is no excuse for not being careful.

Fig 1: With the bolt in the forward position unscrew the magazine tube cap / extension and remove. Grasp the barrel and remove the barrel by pulling the barrel and barrel extension out of the receiver.

Fig 2: Grasp the forend / slide and pull the bolt and action bar forward out of the receiver and remove the bolt and action bar and forend / slide assembly from the slide guide tube. Be careful because once the bolt is removed from the receiver all the pieces from the assembly are free to separate. We suggest you keep the gun with the bolt up when you remove the assembly so the assembly does not separate.

Fig 3: The trigger assembly can be removed with the barrel and bolt removed or without the barrel and bolt removed. To remove the trigger assembly all you do is remove the two pins that hold the trigger assembly in place and pull the trigger assembly from the receiver. The pins can be removed with a hammer and a punch.

TO LOAD YOUR SHOTGUN

1. Make sure the shotgun is pointed in a safe direction at all times, the safety is engaged, and never allow fingers or objects to contact trigger.

2. Do not load shotgun until you are ready to fire.

3. Do not disengage the safety until you are ready to fire.

4. Make sure the ammo that you are using is the correct size and gauge. The barrel is marked with the gauge and chamber size, barrels marked 3.5” will also use 2 3/4” or 3” or 3.5” shot shells.
5. Visually inspect the chamber for obstructions by pulling back the forearm / slide until it stops movement (if the forearm / slide will not move to the rearward position depress the action unlock button Fig 4) . The chamber should be free of oil or grease or obstructions... The chamber is the rear portion of the barrel where the cartridge slides into from the pressure applied by the bolt.

6. Fig 5: With the bolt in the rearward position depress the carrier release button to allow the carrier to move up into the loading position. Insert up to (5) - 2 3/4” cartridges or (5) - 3” or (4) - 3.5” cartridges in to the magazine tube. Note: If plastic spring cap is in magazine tube then all capacities are decreased by one round.

7. FIG 6: With the carrier in the up position you can also insert one round into the chamber before sliding forearm / slide forward until the action locks. The shotgun will now fire if the cross trigger block safety is disengaged.

Warning the magazine the magazine cap is under spring pressure. Note: After assembly of the shotgun the spring in the magazine tube may become twisted. This will cause a decrease in magazine tube capacity. If you load and unload the magazine tube the spring will untwist and the capacity should be as defined in the manual.

If the plastic spring cap is not installed in the magazine tube then use small pin in the hole in the end of the magazine tube to hold the spring during removal of the cap...Simply unscrew the cap until you see the hole in the tube, insert pin thru hole to hold spring.

**TO FIRE YOUR SHOTGUN**

**WARNING**

- Do not disengage the safety until the shotgun is pointed in a safe direction and you are ready to fire

- After the last round has been fired, the forearm / slide and bolt will lock in the reward position when cycled. Never count on the locked back bolt as a signal that the gun is empty.... Use your eyes to verify that the gun is empty.

- If a cartridge does not fire and the trigger has been pulled and the safety is disengaged... Stop! and do the following: a) Make sure the gun is pointed in a safe direction b) Engage the safety c) Wait 60 seconds d) Follow the instruction below for unloading the shotgun

- If during firing the sound of any cartridge is noticeably softer or louder than the previous cartridge fired, Stop! Do not load another cartridge or fire another cartridge and do the following: a) Make sure the gun is pointed in a safe direction b) Engage the safety c) Follow the instruction below for unloading the shotgun d) With the shotgun unloaded visually inspect the shotgun for barrel blockage or damage and inspect the mechanical portion and receiver of the shotgun for damage before continuing.
• PLEASE READ AND UNDERSTAND ALL WARNINGS IN THIS MANUAL BEFORE FIRING THE SHOTGUN, MAKE SURE YOU KNOW WHAT YOU ARE SHOOTING AT
1. Make sure the gun is pointed in a safe direction and that you are wearing ear and eye protection.
2. Engage safety if not already engaged
3. To begin firing disengage the safety, make sure you are ready to fire and the shotgun is pointed in a safe direction to be fired. After you have fired the first round by pulling the trigger to the rear move the forearm / slide back to the rear and the spent cartridge will be ejected. When you move the forearm / slide forward the bolt will strip the round on the carrier and load it into the chamber. If you pull the trigger again the gun will fire. You may repeat this cycle until the magazine tube is empty and the bolt / action locks to the rear.

TO UNLOAD SHOTGUN
1. Make sure that gun is pointed in safe direction and engage safety, if not already engaged. Never allow your finger or any object to come in contact with the trigger during the unloading operation...
2. Fig 7: Depress the Bolt Release Button and slide Forearm / side reward. The bolt should move to the rearward location and if there was a round in the chamber it should be ejected. The next round in the magazine tube should also be lifted by the carrier into the ejection port, once the round in the chamber has been ejected. Remove the round that is sitting on the carrier. Visually inspect the chamber and carrier to make sure there are no more rounds in the chamber or on the carrier. If there is a cartridge stuck in the chamber and it did not come out when you moved the forearm / slide to the rear obtain a cleaning rod and push the cartridge out backward.
3. Fig 8: If there was a round in the magazine tube, the carrier will be, up, in the feed position; once the round has ejected from the chamber. Note: You should of all ready removed the round on the carrier that came from the magazine tube in step 2. Fig 9: Now depress the catch inside the receiver that is holding the rounds in the magazine tube. The catch is a flat metal piece on the right hand inside of the receiver and holds the cartridge in the magazine tube. Also check for any debris or foreign objects in the mechanism or barrel or chamber.
4. Following steps 1-3 is the safest way to unload your shotgun and the procedure we recommend.

DUCK PLUG PLACEMENT:
The wooden rod enclosed with your shotgun is a duck plug and can be placed inside the magazine tube spring from the cap end. Simply the rod prevents the magazine follower from moving the full length of travel.
It is preset for one round in the magazine without the plastic spring cap. You will see a mark on the rod which is where you would cut the rod if you want two rounds in the magazine without the plastic spring cap. If you want to use the plastic spring cap and the duck plug you will have to cut the rod at the mark.

**MANUFACTURER’S WARNING**

This firearm was manufactured to properly perform with the original parts as designed. It is your duty to make sure any parts you buy are correctly installed and that neither replacements nor originals are altered or changed. Your gun is a complex tool with many parts that must relate correctly to other parts for safe and accurate operation. Putting a gun together wrong or with modified parts can result in a damaged gun, injury or death to you or others through malfunction. Always let a qualified gunsmith work on your gun or at least, check any work not performed by a gunsmith. Firearms safety is your primary concern. **THE GUN OWNER MUST ACCEPT FULL RESPONSIBILITY FOR THE CORRECT REASSEMBLY AND FUNCTIONING OF THE FIREARM AFTER ANY DISASSEMBLY OR REPLACEMENT OF PARTS.**

**CLEANING AND MAINTENANCE OF SHOTGUN**

A) Follow procedures for unloading shotgun as described previously

B) Follow procedures for disassembly of shotgun as described previously

1. Materials needed to clean this shotgun are: a cleaning rod, cotton bore patches, brass bore brush, powder solvent, a small soft brush and good quality gun oil.

**WARNING:** Lead or lead compounds are known to the State of California to cause cancer, birth defects, reproductive toxicity, and other serious physical injury. Those who clean firearms should take protective measures to avoid contact or exposure to such chemicals.

2. Using the bore brush with powder solvent scrub the barrel and chamber to remove any powder and lead residue in the bore. Always and lastly, swab with cotton patch with gun oil to coat and protect the bore and chambers from rust and corrosion.

3. Any powder fowling on the firing wall, barrel, etc. can be easily cleaned with a brush and powder solvent.

5. All external surfaces should be wiped down with light coat of rust preventative. Avoid using too much oil as dust and/or debris can get trapped in the oil creating a gum that in time will cause misfires.

6. **CAUTION** in using solvents in gun bore cleaning. Prolonged or excess contact with finish or bluing can damage the gun’s finish. Be sure to wipe away all excess solvent and then lubricate with oil.

7. A gun should be cleaned after firing. In addition, external parts should be wiped with an oiled cloth after handling. A light oil is ordinarily all that is necessary in cleaning if the gun has not been fired or fired very little. If a gun is
used frequently, it must be cleaned after each firing and regularly serviced by a professional gunsmith. If the gun has been stored, remove all excess oil and/or grease before firing. Always check to be sure that no cleaning patch or other obstruction remains in the bore or chambers before firing.

**DANGER -- AMMUNITION WARNING**
Firearms may be damaged and serious injury or death to the shooter or bystander may result from any condition which contributes to the generation of excessive pressure or uncontrolled release of gas within the firearm. Such adverse conditions can be caused by bore or chamber obstruction, propellant powder overloads or by defective, incorrect or improperly loaded and assembled cartridge components. Even the strongest firearm can be blown up as a result of excessive pressure. It is extremely dangerous to use a cartridge whose pressure is greater than that developed by cartridges loaded to industry standards.

**AMMUNITION (CARTRIDGES) NOTICE**
We specifically disclaim responsibility for any damage, injury or death occurring in connection with or as the result of the use of European American Armory shotguns of faulty, non-standard, re-manufactured, hand loaded or reloaded ammunition, used cartridges or cartridges other than factory cartridges for which the firearm was originally chambered.

**LUBRICATION WARNING**
Firing a shotgun with oil, grease or any other material even partially obstructing the bore may result in damage to the shotgun and injury to the shooter and those nearby. Do not spray or apply lubricants directly on ammunition. If the powder charge of a cartridge is affected by the lubricant, it may not be ignited, but the energy from the primer may be sufficient to push the bullet into the bore where it may become lodged. Firing a subsequent bullet into the obstructed bore will damage the shotgun and may cause injury to the shooter and those nearby. Use lubricants properly. You are responsible for the proper care and maintenance of your firearm and ammunition.

**ONE YEAR LIMITED WARRANTY**
This European American Armory Corp. firearms is warranted to the original retail customer for One Year from date of purchase against defects in material and workmanship. All parts and labor or replacement **at our option** are covered. Wood Stock and Wood Slide / Forend are not covered by the One Year Warranty. The warranty on the wood stock and wood slide / forend is 60 days from purchase and only covers manufactured and material defects.
Transportation to and from our repair facilities, government fees, damage caused by failure to perform normal maintenance, sales outside the United States, damage due to use of high velocity, high pressure, reloaded or other nonstandard ammunition, or any unauthorized repair, modification, misuse, abuse, or alteration of the product is not covered by this Limited Warranty.
Any implied warranties, including the implied warranties of merchantability and fitness for a particular purpose, are limited to one year from date of original
To obtain warranty performance send your firearm with proof of retail purchase, freight prepaid to:

European American Armory Corp.
3855 North U.S. Highway One • Cocoa, Florida 32927

WARNING

Altering or modifying parts and/or internal safeties is dangerous and will void the warranty. This shotgun was manufactured to perform properly with the original parts as designed. It is your duty to make sure any parts you buy are made for this firearm and are installed correctly and that neither the replacements nor originals are altered or changed. Your gun is a complex precision tool with many parts that must relate correctly to other parts in order for proper and safe operation. Putting a gun together wrong or with incorrect or modified parts can result in a damaged gun, danger, and injury or death to you and others through malfunction. Always have a qualified gunsmith work on your gun or at least check any work not performed by a gunsmith.

YOUR OWNERS’ MANUAL

Always keep this manual with your firearm. Make sure you understand all the warnings, operation instructions and safety procedures. When you lend, give or sell the firearm, be sure this manual goes with it. You can get a copy of this manual from European American Armory on request.

ALL PARTS ORDERS ARE SUBJECT TO A $10.00 CHARGE FOR SHIPPING AND HANDLING. Please state Model, Caliber, Serial Number, and Finish Color when ordering. For parts, information and service contact: European American Armory Corp., 3855 North U.S. Highway One, Cocoa, Florida 32927 Phone: (321) 639-4842.

⚠️ WARNING

Children are attracted to and can operate firearms that can cause severe injuries or death. Prevent child access by always keeping guns locked away and unloaded when not in use. If you keep a loaded firearm where a child obtains and improperly uses it, you may be fined or sent to prison.

⚠️ ADVERTENCIA

A los ninos los atraen las armas de fuego y los pueden hacer funcionar. Ellos pueden causarse lesiones graves y la muerte. Evite que los ninos tengan acceso a las armas de fuego guardandolas siempre con llave y descargadas cuando no las este utilizando. Si usted tiene un arma de fuego cargado en un lugar en que un nono tiene acceso a ella y la usa indebidamente, le pueden dar una multa a enviarlo a la carcel.
