SAFETY
A. Before using your Vulcan and charger read all instructions in this manual and all cautionary markings on the unit.

B. WARNING: Never leave your Vulcan with its lamp face against any surface, including skin, while in operation. The resultant heat build-up can cause a fire or burns.

C. IMPORTANT: Careful observation of the LED's serves as an important warning of possible charge circuit malfunction, which may cause battery overcharging, the green LED should turn "on" steadily and the red LED should turn off completely within twelve (12) hours of charging time. If the red LED stays on past this time remove the light from service and return it immediately to the Streamlight factory at 30 Eagleville Road, Eagleville, PA 19403 for free evaluation and repair. In extremely rare circumstances an overcharged battery may release a flammable hydrogen gas mixture. In the unlikely event that this mixture should ignite, bodily harm could result.

D. The Vulcan should not be switched on and off during charging unless only the green LED is lighted. Recycle the battery responsibly when no longer serviceable. DO NOT INCINERATE THE BATTERY, EVEN IF IT IS SEVERELY DAMAGED OR COMPLETELY WORN OUT. The battery could explode in a fire. Handle the battery carefully and never allow it to short circuit. A shorted battery can easily start a fire.

E. The Vulcan is approved for use in hazardous locations. You are responsible for the proper application of this product in a properly defined location. DO NOT charge in potentially hazardous areas.

OPERATION
The Vulcan is available in two (2) basic models: the single filament and the dual filament safety back-up model. Both come with convenient recharging racks, either AC/DC or vehicle mount that store light conveniently and do not require Vulcan disassembly for charging. The battery is rated at a nominal 4.5 ampere-hours and is capable of being recharged up to 500 times.

To release the light from the rack push the black bar down, slide the light forward and lift up. The on/off switch is underneath the handle. Turn it in either direction for "on" or in the dual filament model, rotation of the switch to the right
selects one filament, to the left, the other. Slide the switch lock, located on the
front of the handle, down to prevent accidental activation. The strap attachment
clings on the handle. Store down in a retracted position when not in use. "O "
Rings in the facecap ensure that Vulcan is waterproof to 100 feet. To maintain
waterproofness, lubricate both "O " Rings with silicone grease and keep
facecap tight.

CHARGING AND CHARGE RACKS
Charge your Vulcan overnight before its first use. Charging will occur only when
the lamp is off. The battery should be charged as soon as possible after use to
ensure maximum service life. The batteries should never be "exercised" in an
attempt to erase "memory," which never occurs with lead-acid batteries. A pair
of charging indicators are on the charging rack. The red LED means that the
light is charging. The green LED means it is fully charged and ready for use. It is
important to understand that a battery can take only minutes to a maximum of
twelve (12) hours to fully charge, depending on the battery's residual charge
and other factors. When fully charged the red LED should turn "off" completely
and the green LED should turn "on" steadily.

CHARGING AND CHARGE RACKS
Charge your Vulcan overnight before its first use. Charging will occur only when
the lamp is off. The battery should be charged as soon as possible after use to
ensure maximum service life. The batteries should never be "exercised" in an
attempt to erase "memory," which never occurs with lead-acid batteries. A pair
of charging indicators are on the charging rack. The red LED means that the
light is charging. The green LED means it is fully charged and ready for use. It is
important to understand that a battery can take only minutes to a maximum of
twelve (12) hours to fully charge, depending on the battery's residual charge
and other factors. When fully charged the red LED should turn "off" completely
and the green LED should turn "on" steadily.

The charge rack is designed to hold the Vulcan in virtually any position. Three
(3) self-tapping #8 x 1 1/2" screws are included to mount the charger; use
1/8" holes. Two types of racks are available. The AC/ DC charge rack can
use three (3) interchangeable power cords: P/ N : 22051 12V DC cord with
cigarette lighter plug (DC1); P/ N 22311 120V AC cord and P/ N 21725
230V AC cord. The vehicle mounted direct wire rack has a tinned and striped
cord and is meant for permanent installation in a vehicle.

VEHICLE INSTALLATION
WARNING: A shorted auto battery can easily start a fire. Use the proper insulat-
ed connectors and be sure that your installation is fused with a 2 amp slow
blow fuse. If you are not comfortable with this type of work have the Vulcan
charger installed by a skilled professional. Never attempt to directly wire this
rack to a 110 volt AC power source. It is intended for 12-15 volts.

If the vehicle is used daily connect the charge rack directly to the battery or an
unswitched terminal on the vehicle fuse block. Route the wires from the mounted
charger base to the 12 volt power source. The positive lead has a colored
trace and should be connected to the side of a fuseholder which is dead when
the fuse is removed. The untraced lead is negative and may be connected to
any convenient chassis ground.

LAMP REPLACEMENT
CAUTION: The inner bulb operates at a high temperature and is pressurized.
Allow to cool and wear safety glasses before handling. Two types of bulbs are
used in the Vulcan par 36 lamp assembly: a halogen bi-pin and a xenon dual
filament. The wattage and voltage is embossed on the single filament bi-pin
bulb. The standard dual filament is a 6 watt bulb with a blue base. Check to
see if you are installing the desired replacement.

1. Remove lens ring and lamp assembly from the lantern. Do not pull
on the wires.

2. Remove white threaded lamp socket at the back of the assembly and
pull the old bulb straight out from the socket.

3. Replace with new bulb by aligning its bi-pins with holes in socket and
seating firmly. Use a clean cloth or tissue when handling bulb.

4. Wipe any fingerprints off the new bulb and thread socket into reflector
assembly. Socket can be screwed in or out, as required, to provide
optimal focus. Reinstall assembly.

BATTERY REPLACEMENT
Remove the threaded facecap and lens assembly. Remove the two (2) screws
that retain the battery clamp and the two (2) wires and spade lug terminals on
the top of the battery. Connect the red wire to the positive (+) tab of the battery
and the black wire to the negative (-) tab. Reversing these connections will dam-
age the Vulcan. Replace the battery clamp, lamp, and facecap. Keep the face-
cap tight for maximum waterproofness.

WARRANTY Streamlight Vulcan®
Streamlight makes no express warranties other than those expressly provided herein. Streamlight does not make, and hereby expressly disclaims, any implied warranties, including warranties of merchantability or fitness for a particular purpose, except to the extent that implied warranties may not be disclaimed under applicable law. To the extent any such implied warranties may not be disclaimed under applicable law, the duration of such implied warranties shall be limited to the minimum period required by applicable law. Streamlight’s responsibility under all warranties, both expressed and implied, shall be limited to the repair, replacement or refund of the purchase price of any products covered by such warranty. Streamlight shall, in no event, be liable for any other damages, including consequential or incidental damages. Some jurisdictions may not allow the waiver of or limitations on the scope or duration of implied or expressed warranties or on the exclusion of consequential or incidental damages. Some jurisdictions may not allow the waiver of or limitations on the scope or duration of implied or expressed warranties or on the exclusion of consequential or incidental damages, in which case the above waivers, limitations or exclusion may not apply to you.

Money Back Guarantee
Your Vulcan system is unconditionally guaranteed to perform to your satisfaction or your money will be refunded. Return your Vulcan to the seller (shipping charges prepaid) within ten (10) days of purchase, along with receipt or any proof of purchase for full refund.

Warranty Registration Card
Complete and return Warranty Registration Card within ten (10) days of purchase to register your warranty. Retain your receipt or any proof of purchase. Failure to return the Warranty Card and receipt or proof of purchase as required will invalidate the warranty and service coverages described herein.

One Year Warranty
Your Vulcan system, including battery, case, and chargers, but excluding lamp, is warranted for a period of one (1) year from the date of purchase. Should your Vulcan fail to operate, return it (shipping charges prepaid) to the factory or Authorized Service Center at the address listed with these instructions along with receipt or any proof of purchase. Streamlight will repair or replace the defective parts without cost and return the unit to you (shipping charges prepaid within the Continental USA), or at Streamlight’s option, if permitted by law, Streamlight will refund your purchase price.

Switch Warranty
The switch of your Vulcan is guaranteed for life. In any country or jurisdiction where specific limitations are placed on lifetime warranties Streamlight will honor a 10-year limited warranty. Should the switch fail to operate, return the Vulcan (shipping charges prepaid) to the factory or Authorized Service Center at the address listed with these instructions, along with your receipt or any proof of purchase. If you have owned your Vulcan for more than one (1) year include $5.00 for handling. Streamlight will repair or replace the switch without cost and return the unit to you (shipping charges prepaid within the Continental USA).

Limitations on Warranty and Service Coverage
1. Warranty is invalid if, in Streamlight’s sole opinion, there has been tampering, alteration, abuse, misuse, or failure to follow proper care and maintenance procedures.
2. This warranty shall not extend to repairs by anyone other than Streamlight or other than service facilities designated by Streamlight.
3. This warranty is limited to the original user-purchaser as such appears on the Warranty Registration Card.

Should your Streamlight fail to operate, contact the closest Authorized Service Center or the factory directly at (610) 631-0600 or (800) 523-7488.
