InfraStruXure™ Packaged System for Small Data Centers

ISXT280HD8R

- Complete, pre-configured multi-rack InfraStruXure™
- · Includes power, cooling, racks, management, and services
- (8) usable IT racks
- Up to 10kW average density per rack, hot-aisle containment upgrades available
- Output power capacity of 80kW, N+1

Starting at \$399,999

InfraStruXure™ Packaged System for Medium Data Centers

ISXT280MD40R

- Complete, pre-configured multi-rack InfraStruXure™ solution
- · Includes power, cooling, racks, management, and services
- (40) usable IT racks
- Up to 5kW average density per rack, high density upgrades available
- Output power capacity of 80kW, N+1

Starting at \$699,999

demand architecture for network-critical physical infrastructure

APC's InfraStruXure™ is on-demand architecture for network-critical physical infrastructure (NCPI). The InfraStruXure design integrates power, cooling, rack, management, and services using standardized, modular components. InfraStruXure is available in packaged, customized, or mobile systems.

Order online at APC's Store:

InfraStruXure **Customized** System

solutions.apc.com

7 1-888-289-APCC x3320

InfraStruXure Mobile System

InfraStruXure easily scales to meet the changing needs of IT environments, from wiring closets and computer rooms to data centers. Its award-winning, patent-pending approach to data centers on demand:

- · increases availability
- · improves adaptability
- · speeds deployment
- · lowers total cost of ownership

InfraStruXure includes InfraStruXure Manager, a browseraccessible, user-friendly tool for monitoring power, cooling, and environmental conditions at the rack or room level. APC Global Services optimize the NCPI throughout the complete data center life cycle.

InfraStruXure™ Packaged System for Wiring Closets

ISXCR1SU1KP1

- Complete, pre-configured single-rack InfraStruXure[™] solution
- Includes power, rack, network management. cable management, blanking panels, network cable troughs, and rack-mount power distribution
- Expansion rack systems are available to create multi-rack configurations
- Output power capacity of 1.5kW
- Next-day delivery*
- Ships fully assembled

Starting at \$2,550

*Delivery times may vary

'As IT Director, my imperative was to find a protect our communications uninterrupted power.

With InfraStruXure™, I know with our customers."

-Markus M. Hill Director of Technology and Information Services

watertight solution that would infrastructure by guaranteeing

that no matter what happens, power flow won't be interrupted. I don't waste time wondering about how many circuits I need to set aside for the panel, or if I need a circuit breaker in the panel. I know InfraStruXure is running behind the scenes, protecting my equipment, my company, and allowing us to communicate

Brayton International

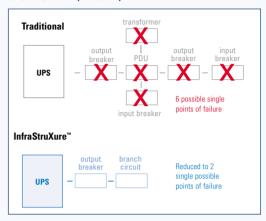

Call to order 1-888-289-APCC x3320

INFRASTRUXURE™ MEETS THE 3 KEY CONSIDERATIONS OF A STRONG NETWORK-CRITICAL PHYSICAL INFRASTRUCTURE (NCPI)

INCREASE THE AVAILABILITY AND RELIABILITY OF IT SYSTEMS

- Highest cooling density available (up to 20kW of cooling per rack)
- · Increases runtime from minutes to days
- Redundant design of system eliminates single points of failure
- · Factory pre-tested system reduces downtime
- Hot swappable modules lower mean-time-to-recovery
- Proactive management identifies potential problems before they occur
- Locking enclosures provide enhanced security

ADAPT QUICKLY TO CHANGING **ENVIRONMENTS AND TECHNOLOGIES**

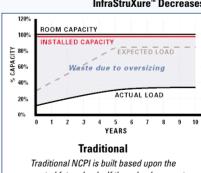

- Rack-based modular approach allows system to be easily moved
- Scalable design accommodates changing power densities
- Power distribution system accommodates changing power densities, voltages, and receptacle types
- Vendor-neutral enclosures guarantee compatibility with major IT vendors
- Pre-configured systems
- Web-based configuration tool simplifies design process
- Configure-to-order approach accelerates installation
- Integrated pre-engineered system eliminates need for on-site system test
- Rack-based, standardized modules facilitate quick installation

InfraStruXure™ Increases Speed of Deployment **Traditional** 4 to 5 months InfraStruXure™ IT project NCPI deployment 1 to 3 wks NCPI deployment The InfraStruXure™ approach includes a revolutionary on-line design and modular system components that dramatically increase the speed of deployment. Now NCPI deployment can

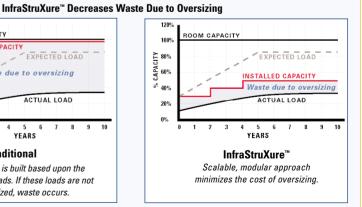

keep pace with the deployment of new IT projects.

MINIMIZE UPFRONT AND OPERATING COSTS

- On-demand design prevents oversizing and lowers cost
- Standardized modules minimize one-time engineering costs
- Built-in redundancy eliminates need to buy second UPS
- Integrated cabling and cooling eliminates need for raised floor

expected future loads. If these loads are not quickly realized, waste occurs.

InfraStruXure™ Packaged System for Computer Rooms

ISXCR1SY12K16P5

- · Complete, pre-configured single-rack InfraStruXure™ solution
- · Includes power, rack, network management, cable management, blanking panels, network cable troughs, and rack-mount power distribution
- · Expansion rack systems are available to create multi-rack configurations
- · Output power capacity of 16kW
- Next-day delivery* · Ships fully assembled
- *Delivery times may vary

7 1-888-289-APCC x3320

"The NetShelter® VX

Call to order 1-888-289-APCC x3320

addresses the issue of server density. Superior cable management makes it possible to install more server power per rack....the racks can accommodate all brands of servers, so an investment is preserved if you decide to move from one brand of server to another."

—Todd Crystal, Team Manager Edward Ortenberg, President Spencomp Technologies, Inc.

BLADE-READY SOLUTIONS

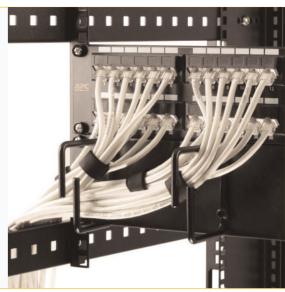

The arrival of blade servers has changed the rules of READY data center design, with advanced

power distribution and heat removal becoming the new standard. APC has stationary and rackmounted power distribution units that can handle the larger loads blade server applications require. To address the cooling challenges created by blade servers, APC has rack-based air distribution and removal units, as well as hot-aisle containment systems. APC works with you to determine your requirements and integrate the rack, cooling, and power distribution solution to meet your specific needs.

CABLE MANAGEMENT

As the number of IT components within each rack enclosure continues to increase, so do the number of power and data cables. Traditional overhead cable trays and under-floor cabling systems limit flexibility and adaptability. Under-floor plenum material is costly and resource-intensive to install, and under-floor branch circuits can negatively affect air distribution.

APC has responded with a comprehensive selection of optional components that allows you to pick the ideal cable management solution for your IT environment. Accessories such as shielded power cable troughs and data partitions create self-contained cabling, eliminating the need to use space under a raised floor and permitting better organization in non-raised floor environments.

1U and 2U Horizontal Cable Organizer

AR8425A, AR8426A

- · Facilitates front cable management
- · Integrated front cable hoops
- Occupies 1U or 2U of rack space
- · Includes installation guide and mounting

Starting at \$29

Cable Management Rings

AR8113A

- Facilitates side/vertical cable management
- · Organizes data and power cables
- Includes mounting hardware and Velcro mounting straps

RACK CONFIGURATOR TOOL

Hot-aisle Ceiling Tiles/Cable Trough

Seals in hot air, prevents mixing

Hot aisle

Access to hot aisle

Patent

Hot-aisle Containment System*

NetworkAIR™ IR Series

Horizontal airflow for in-row operation

- · Hot-aisle containment for high-density configurations
- · Cable access brush strip blocks air from escaping through holes surrounding cabling
- · Ceiling tiles close off the top of the hot aisle to prevent warm air from mixing with room air
- One-way locking door secures the hot aisle while allowing for quick exit in case of emergency
- · Expansion kit expands the hot aisle by one rack space on both sides to accommodate growth

Starting at \$399

· In-row precision air conditioning for data centers and

- · Warmer return air temperature maximizes the capacity of the system for increased efficiency
- · Intelligent, proactive control, and real-time monitoring; master microprocessor provides high level control functionality
- · Full service, front access for routine servicing of components: narrow footprint allows for sideby-side placement

Starting at \$29,800

*Typical configuration pictured at left

air distribution and hot-aisle containment

Ensuring the proper environment for IT systems is essential to maintaining high availability. Regardless of application, IT equipment produces heat that can be damaging to both uptime and the longevity of your investment.

Precision

Cooling

Data center cooling has become increasingly unpredictable due to the use of blade servers and other high-density equipment. APC promotes in-row cooling, where the cooling unit is moved closer to the source of heat generation, and containing the hot aisles of the data centers to address this challenge.

Cold aisle

APC cooling solutions are tailored to meet the needs of your environments, from wiring closets and computer rooms to data centers of all sizes. Scalable solutions, including air distribution/fans, portables, and precision cooling systems, are available to provide the right solution to meet the unique cooling requirements your environment demands.

TRADITIONAL COOLING METHODS VS. APC'S INNOVATIVE SELF-CONTAINED COOLING

These simulations show IT enclosures in a data center environment, arranged in a hot aisle/cold aisle format, where rack fronts face other rack fronts, and rack backs face other rack backs.

Before: Using traditional cooling methods, the heat generated in IT racks circulates throughout the room. This results in the mixing of hot and cold air, preventing efficient cooling of highdensity areas.

After: Innovative InfraStruXure™technology utilizes a self-contained cooling system that doesn't require cooling of the entire room. This technology neutralizes hot air where it is created, resulting in the ability to cool up to 20kW in any rack.

Management

proactive tools for monitoring and control

Whether managing a single device or multiple device types, APC Management Solutions are easy to use, quick to deploy, and easy to maintain. Working together and independently, they allow the user to monitor devices locally over existing IT networks or via Web browser. Alerting the administrator of changes and potential threats helps to maintain high uptime and system availability. APC applies extensive knowledge of both network and building management systems to the development and implementation of management tools providing you with innovative reliability solutions.

These solutions increase availability by allowing the user to remotely monitor and easily control the power, rack, and cooling on which your IT environment depends.

"With InfraStruXure™ Manager, we can remotely monitor the PDU, UPS and the power strips in the racks that support the servers, all from a Web interface. We receive automatic e-mail alerts. which allows us to address problems before they impact our systems and our users. Since our IT staff is stretched rather thin, it's nice to have the ability to fix problems without having to dispatch personnel to physically gather the monitoring data."

Hunter McFadden, Senior Network Engineer Glenwood Regional **Medical Center**

Service and support

for the life cycle of your investment

Dedicated to creating systems that are easy to manage, APC designs products to be self-serviceable. Sometimes, a problem occurs that requires extra resources, expertise, and tools. This is where APC Global Services (AGS) comes in.

Building upon APC's advanced product engineering and predictive management software, APC Global Services pre-

vents problems throughout the life cycle of the data center, with services such as planning and installation, remote monitoring, and preventative maintenance. Staying a step ahead of industry trends and requirements, APC Global Services supports your investment from the time of product purchase throughout the life of the hardware.

Solutions for **Business Networks**

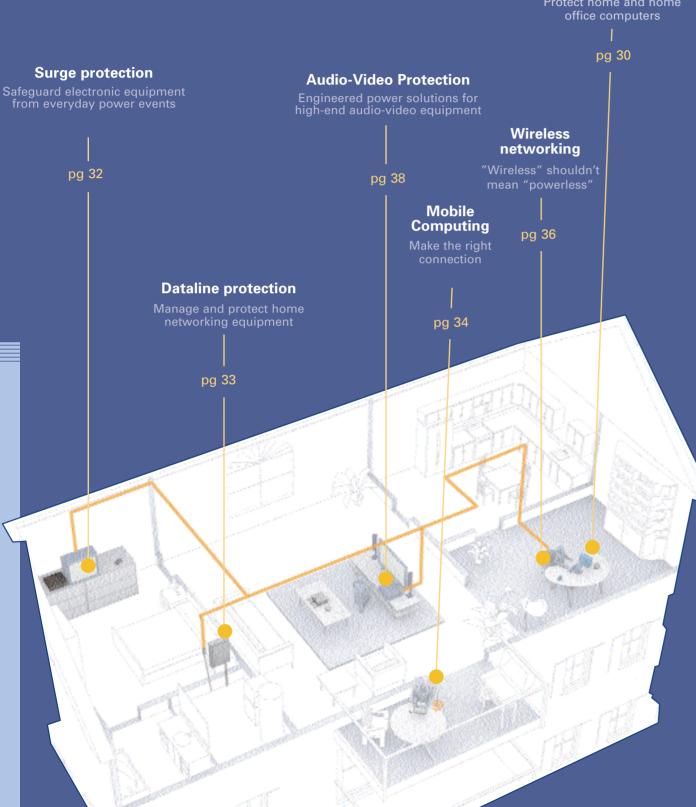

Battery backup and quality surge protection solutions for computers, home entertainment, security, and gaming systems.

Desktop power protection

Protect home and home office computers

Local powering solution

for fiber to the home, wireless local loop, VoIP, and VoDSL

As service providers offer services for telephony and data, reliable powering of the outside plant and customer premise is essential. Powering should be scalable, with low initial capital costs during new services ramp up. Since telephony and data demand a diligent proactive management and preventive maintenance strategy, all products are equipped with status monitoring signaling for the service provider.

PowerShield®

CP24U12NA3-F

- 48VDC, < 150W or 12VDC < 75W
- Local powering solution for cable telephony, wireless local loop, fiber to the home, VoIP, and VoDSL
- Input frequency 47 70 Hz (auto sensing)
- Input connection type IEC 320 C5
- Input voltage range for main operations - 87 - 264 V
- Standard warranty 2 years repair or replace

Starting at \$79.99

APC helps us meet our customers' high expectations

by providing us with a power protection architecture that is tightly integrated with our generator set.

'As a global e-business, we appreciate the reliability, quality and service we receive from APC products around the world."

protection

As more and more industries move to the automated controlling of their processes, they require more sensitive equipment in their facilities. This increases the need for a stable, secure power supply to ensure production and business continuity.

APC has a solution set designed specifically for industrial applications such as manufacturing equipment, automation control, material and packaging handling, and various types of IP-based devices. Using proven industrial technology, APC solutions offer the high availability, quality, and manageability that these applications require.

THE COSTS OF **DOWNTIME**

In the Information Age, availability equals viability. Now that data is the livelihood of businesses across the globe, downtime is no longer just measured monetarily.

As hospitals seek to improve the quality of patient care through IT-based applications, system availability is crucial for information security. With new federal regulations such as HIPAA and Sarbanes-Oxley enforcing more stringent availability requirements, businesses face a higher level of scrutiny in maintaining the credibility of their core applications.

"A power failure in the EMS industry would be devastating to our company, and to the community. If our systems were to fail, peoples' lives would be in danger."

> —Todd Goodsite Information Systems Coordinator North Central EMS

and battery backup for pure uninterrupted power

You've invested a lot of time, effort, and money to build the best high-performance system possible. You expect and demand the most realistic cinematic performances your home theater technology can provide. But, in the span of a single movie frame, your entire investment can be lost due to bad power. Every day, power fluctuations, noise, and outages can make it impossible for your system to perform to its maximum capability. Volatile mem-

Why Buy From APC?

Fast and Easy

You can shop online anytime, day or night, at the APC Online Store. Visit solutions.apc.com to buy all the availability solutions you need from one trusted

If you prefer to order by phone, or if you have questions, just call 1-888-289-APCC, ext. 3320. Our knowledgeable sales representatives are available to help you, Monday through Friday, 8 A.M. to 8 P.M., eastern standard time.

No Guesswork

APC provides you with all the information you need to make the right buying decision. Just look for our detailed, easy-to-use online product selectors to help you determine the best solution for you. If you require additional help, or have further questions, just call one of our highly trained sales representatives, who can be reached by phone at 1-888-289-APCC ext.3320.

Equipment Protection Policy

For as long as you own the product, if your properly connected equipment is ever damaged by an AC surge, including surges due to lightning, APC will replace your product and at our option repair or reimburse the fair market value of the connected equipment for up to \$100,000 (value in the US and Canada only). See product for dollar amount pledged and policy for terms and conditions.

Comprehensive Product Warranties

APC products are backed by comprehensive warranties and policies to afford basic peace of mind right out of the box. Most APC products ship in the United States and Canada with a standard two-year comprehensive warranty. Depending on your location or product you may instead have a one- or threeyear warranty. For more information, please consult your accompanying product documentation. Extended warranties are also available for select products.

Online Product Support

Staying informed and getting answers to your questions is easy with APC's online Knowledge Base database. The Knowledge Base contains valuable information gathered from APC Engineers, Product Managers, and customers like you, and is regularly updated by the APC Customer Solutions Team.

If you can't find what you are looking for in the Knowledge Base, you can submit your question directly to the APC Customer Solutions Team, and then track the status of your questions. Or for immediate assistance, chat online with an APC Technical Support Representative, Monday through Friday, 8 A.M. to 8 P.M., eastern standard time.

APC has received more than 100 awards in 2004 alone. Join the over 15 million satisfied customers who rely on APC's Legendary Reliability.™

Terms and conditions

THESE TERMS AND CONDITIONS ARE INCLUDED WITHIN ALL CON-TRACTS FOR PRODUCTS AND SERVICES PURCHASED FROM THE AMER-ICAN POWER CONVERSION (APC) WEB SITE OR THROUGH THE APC ONLINE STORE AND THE APC CALL CENTER.

This is an important document that affects your rights and obligations. It also includes exclusions and limitations that apply to you. The terms and conditions may be subject to change by seller without notice although changes will not affect contracts that have already come into existence. You will be asked to approve the complete site terms and conditions every time before you place an order to purchase.

APPLICABILITY

Your order shall be the offer to purchase. Seller reserves the right to refuse to accept orders and all products and services are subject to availability. Any order containing an item that sells completely out of stock will be cancelled. Seller shall accept orders by confirming the order in writing, or delivering or invoicing any of the products or commencing provision of the services. Seller shall not be deemed to have accepted any such order until such confirmation, invoicing, delivery or provision. The seller has the right to decline or cancel any purchase order containing erroneous prices. On acceptance of an order a contract will be made between seller and customer. The invoice the customer will receive will cross-refer the customer's order number and will indicate where payment is to be

For the purposes of these terms & conditions the call center is that call center operated by APC and contactable on telephone numbers: North America - (888)WWW-APCC, (1-888-999-2722) 8AM-8PM EST. If orders are placed with the call center then binding legal obligations may be created upon acceptance of your oral orders. Seller's acceptance of your orders will be confirmed electronically or sent by mail. Legal acceptance of your order is effective at the time of seller's sending or posting of the acceptance mail.

If there is a revision or cessation of a product that is the subject of a contract then seller may ship products with the functionality of

the products ordered but there will be differences in what is shipped to what has been ordered. Where functionality cannot be matched with the ordered products seller will advise customer either of a suitable alternative that may be supplied or of a cancellation of the contract (or at seller's discretion the part that refers to the product in question). Subject to the return policy below, upon such cancellation seller shall make a full refund to customer of the payments received for the relevant cancelled products and neither party shall have any further liability to the other for the same

PRICE AND PAYMENT

The price of the products and services is stated in the Web site or in the order accepted by seller. Shipping charges are identified separately to the price of the products and services. Prices are quoted in US dollars and are subject to change without notice. Price changes do not affect contracts created after acceptance of customer orders. Prices exclude shipping, handling, and taxes unless otherwise noted. Customer is responsible for shipping charges, VAT and other sales taxes as specified in the contract. Orders shipped to the following US states will be charged sale/use tax: CA, CO, CT, FL, GA, IL, LA, MA, MD, MI, MN, NC, NJ, NY, OH, OK, PA, RI, TN, TX, VA, VT, and WA. We accept VISA, MasterCard, American Express and Discover-Novus credit cards for payment. Payment in US dollars (\$US) is the only acceptable form of payment.

DFI IVFRY

Products and services will be delivered to agreed locations for the charge set out in the contract. Seller shall be responsible for the insurance and care of products and services up to the point of delivery. Once delivery has occurred then the products and services are customer's responsibility and customer should insure the same in accordance with prudent

business practices.

Times for delivery are targets only and seller shall not be responsible for late delivery. APC does not ship partial orders. This means that if you've ordered items that are indicated as being temporarily OUT OF STOCK along with ones that are IN STOCK, we will not ship until the backorder can be

RETURNS

NON-WARRANTY RETURNS. APC accepts non-warranty returns of all items except for opened software products under the following circumstances:

APC will accept returns within 30 days from the day the order is shipped. Only returns with a Credit Material Authorization "CMA" number will be accepted. A 15% restocking fee will be applied to all returns. To obtain a CMA number you must speak with an APC representative at (888)WWW-APCC, (1-888-999-2722) from 8AM-8PM EST. Shipping and handling charges are not refundable. No returns will be accepted after 30 days.

Please note that we can process refunds only for items purchased directly from APC's factory store, demo store, personal page stores, and any other store that is available in North America at http://commerce.apcc.com.

RECEIVE A REFUND. Once the return is received, please allow 7-10 business days for the credit to appear on your account. The credit will be issued to the credit card used for the purchase minus any collection fees or restocking fees if applicable.
