

AI3 and AI4 ADAT Interfaces Product Overview

Product Description

Up until now, affordable, high-quality digital interfaces were non-existent. Enter the Alesis AI3 and AI4.

The AI3 provides you with 8 channels of A/D-D/A conversion. Our industry standard 24-bit converters will ensure the smoothest and cleanest conversion available on the market for under \$1000, and with the choice to operate at +4/-10dBu, the AI3 will make the conversion of ANY signal completely seamless.

The Alesis AI4 will allow up to 8 channels of AES/EBU to be converted into the ADAT Lightpipe format, and vice versa. And how are you supposed to sync all that digital gear in your studio together? Again, very easily.

The AI4 has a BNC Word Clock input, as well as separate clocking capabilities for each format conversion, which will make your audio clean and error-free! Talk about versatility! The AI4 will certainly be the heart and soul of your digital studio.

Key Features and Benefits

AI3 features:

- 24-bit analog-optical interface
- 8 balanced or unbalanced 1/4" inputs
- 8 balanced or unbalanced 1/4" outputs
- Switchable +4/-10dBu operating level
- 8 channels of ADAT optical I/O
- Input meter on front panel
- Simple user interface
- 1U rackmountable

AI4 features:

- 8 channels of AES/EBU to ADAT Lightpipe format conversion
- 8 channels of ADAT Lightpipe to AES/EBU format conversion
- Separate clocking for each format conversion
- Supports sample rates from 44.1kHz up to 96kHz
- BNC Word Clock input
- Simple user interface
- Front-panel input and clock source selection
- 1U rackmountable

AI3 shipping weight and dimensions:

Dimensions: 19"x1.75"x6"
(483mm x 45mm x 153mm)
Weight: 4.50lbs. (2.0kg)

AI4 shipping weight and dimensions:

Dimensions: 19"x1.75"x5.8"
(483mm x 45mm x 147mm)
Weight: 3.94lbs. (1.8kg)
