

Combo Pedal Board**Description**

The Alesis Combo Pedal Board features two foot switches and one expression pedal in an all-metal chassis with a non-skid footpad and feet.

When used with Alesis SpitFire amps, the expression pedal allows realtime control of parameters like volume, wah, or distortion. The Combo Pedal Board's dual foot switches allow up/down scrolling through 80 presets. The switches can also be pressed simultaneously to activate the guitar tuner, and held down to mute output.

In addition, the Combo Pedal Board is compatible with amplifiers and keyboards from many other manufacturers.

Positioning

Great controller for amplifiers and keyboards, including the Alesis SpitFire series

Applications

- Alesis SpitFire guitar amp control
- Instrument amplifier control
- Keyboard control

Key Features & Benefits

- 1) Two multi-function footswitches
 - Scroll up and down through Alesis SpitFire presets
