

GigaMix 4CD

Product Description

The Alesis GigaMix series offers incredible performance and value in powered PA mixers. Portable and rugged, the GigaMix 4CD includes 100 28-bit digital effects, 3 band active EQ on all input channels, high-pass "rumble filter" on main outputs, post fader effects send and return for external effects, a master tape send and return for recording and playback, and footswitch input for effects bypass. The GigaMix 4CD features 4 channels XLR mic and 1/4" line inputs plus two channels with stereo line inputs. It contains a single 9-band graphic EQ and 200 Watts of power with a mono main output. Also included is a durable built-in CD player designed for the demands of the road.
