

# Quadraverb GT Reference Manual

## Update and Correction Notice

**Page 35 Section heading "Cabinet Simulator" should read:**

### **Cabinet Simulator Global Control**

Much of the sound of an electric guitar doesn't come just from the guitar amp or effects, but from the sound of the speaker cabinet. The GT includes two very realistic Cabinet Simulators for simulating the sound of speaker cabinets. In addition there's a convenient Global override function that allows you to: 1) Turn off the Cabinet Simulators globally without losing the individual program settings, if you're driving your GT directly into an amp; or 2) Choose Cabinet Simulator 1 or 2 globally for special applications where the individual settings are not appropriate. This saves you the hassle of reprogramming all your patches. There are two Modes for the Cabinet Simulator:

**Mode 1: PROGRAM.** This Mode stores the Cabinet Simulator setting with each program. Use PROGRAM for all basic individual program editing and for normal storage of Cabinet Simulator settings in individual programs.

**Mode 2: GLOBAL.** This Mode overrides the individual program Cabinet Simulator settings for use with a guitar amp or special situations. There are 3 choices in GLOBAL Mode:

1. **OFF.** Use this when you're using your GT with a guitar amplifier. You probably won't want the effect of the Cabinet Simulators combined with the sound of your guitar amp's speakers. This conveniently turns off the Cabinet Simulators globally without losing the individual program's settings.
2. **CABINET 1.** This allows you to override individual program Cabinet Simulator settings and only use Cabinet 1, without losing the individual program's settings.
3. **CABINET 2.** This allows you to override individual program Cabinet Simulator settings and only use Cabinet 2, without losing the individual program's settings.

To choose Mode 1 or 2, press Preamp until the display reads:

**CAB SIMULATOR  
PROGRAM  
or  
CAB SIMULATOR  
GLOBAL**

Scroll Value Up or Down to choose the Mode you want.

If you choose PROGRAM, Press PAGE Up and Scroll with the Value Buttons to choose these three options: OFF; CABINET 1; CABINET 2.

If you choose GLOBAL, Press PAGE Up and Scroll with the Value Buttons to choose these three options: OFF GLOBAL; CABINET 1 GLOBAL; CABINET 2 GLOBAL.
