

PowerTrip8

Product Description

The PowerTrip8 is a power conditioner, light module, and voltage meter in an affordable, one-rack space unit.

The PowerTrip8 supports 8 grounded AC jacks on its rear panel, activated via a large lit power switch on the front panel. The PowerTrip8 offers superb surge and transient suppression, so all power outputs are clean and noise-free.

The unit features a large front-panel LED display that shows current AC line voltage for informed power management. Also on the front panel, the PowerTrip8 contains two pull-out light bars that have their own separate on/off switch and dimmer-control knob.

Positioning

Affordable, compact power module with extra features like LED voltage meter and two light modules.

Applications

The PowerTrip8 is the perfect power hub for any equipment rack.

Key Features & Benefits

- 1) Provides clean AC power
 - Conditions power
