

**RA150/RA300/RA500****Product Description**

The Alesis RA100 power amplifier has long been a favorite choice of musicians, hobbyists, and professionals alike. Now Alesis updates the RA amplifier line with three new models featuring beefed-up power ratings, rugged construction, and stylish industrial design. With advanced convection cooling, there are no fans to create noise in the studio.

**Positioning**

The RA series provides the best choice of powerful, affordable, stylish, and noiseless power amplifiers for powering studio monitors.

**Applications**

The new RA series of amplifiers are perfect for powering monitors in project and commercial recording studios, mastering facilities, TV/video/film post production houses, broadcast control rooms, and guitar/bass rigs.
