

TransActive 50

COMPACT MULTI-PURPOSE AMPLIFICATION SYSTEM

The TransActive 50 is a portable 50 Watt (RMS) multi-purpose mixer/speaker/amplifier, featuring 2 input channels plus an aux input and a selection of internal digital effects. Driven by a 5-inch LF driver and a 1-inch tweeter for full-range sound reproduction, the TransActive 50 powered stereo system is perfect for musicians on the go—ideal for a small keyboard setup or as a compact vocal PA.

Channel 1 features an XLR microphone input and 1/4-inch stereo inputs, while Channel 2 offers 2 1/4-inch stereo inputs. The master section of the TransActive 50 features a high, mid, and low frequency EQ, plus selectable digital effects (reverb, chorus, delays and rotary).

FEATURES

- 50W 2-channel keyboard/PA amplifier
- 1 XLR microphone or stereo quarter-inch inputs for Channel 1 with a post-fader reverb send
- Channel 2 provides stereo line inputs with a post-fader effects send
- RCA aux inputs for equipment such as CD or MP3 players
- Internal digital effects processor with 3 preset effects
- 3-band EQ in master section
- Headphone output
- Wall mount capabilities for use as an install PA cabinet
- Stereo link feature shares the same master audio bus between two amplifiers allowing for stereo operation between two TransActive 50 units for additional inputs, providing a total of 4 stereo inputs and 100 watts.
- Light-weight design with a durable, molded body and a convenient built-in handle slot
- Built-in florescent light above the front panel knobs for viewing settings in low light conditions
- Mic stand mount on bottom of the cabinet to mount the speaker for stage applications
