

iMultiMix 9R

9 CHANNEL RACK-MOUNTED MIXER, PLAYER WITH UNIVERSAL DOCK FOR IPOD[®]

The iMultiMix 9R is a one-of-a-kind, rack-mounted tool for mixing and playback directly from an iPod. Video output equips the iMultiMix 9R for use in nearly any venue as the perfect audio and video playback device. This sturdy, compact, all-in-one rack-mounted mixer integrated iPod player features 5 mic / line inputs with inserts to allow for easy external processing of incoming channels, or iPod audio playback. The iMultiMix 9R also features 3 band per channel EQ, Mic/line inputs and iPod playback in a single, intuitive package.

The iMultiMix 9R can playback music from the iPod and mix your live performances instantly with 2nd through 5th generation iPods. This makes the iMultiMix 9R perfect for using the iPod as a backing track for solo or band performances, while mixing sound sources all in one compact, convenient place. The added resolution of its 60mm faders insures clear indication of audio level every time. For ultra-clean mixing of any performance, including home studios, musicians, small or large venues, and houses of worship, the iMultiMix 9R is an ideal solution.
