Chapter 1 Introduction

Thank you for purchasing Altinex SR1401XL.video scalar. With SR1401XL, you can turn your existing standard video into a high quality picture on your display devices. The system set up is very easy and no additional hardware or software required. You don't need to learn a complicated set up procedure and you can enjoy your SR1401XL with just plug and play.

Important Notices

Please use the SR1401XL under a normal environment

1. Try to avoid following circumstances:
 - Avoid exposure to direct sunlight or high temperatures
 - Avoid exposure to moisture or high humidity
 - Avoid positioning in unstable places
2. Do not attempt repair yourself, the warranty does not cover repair or attempted repair by unauthorized personnel.
3. Unplug this product from AC outlet and remove batteries from the IR control when this product is left unused for a long time.

Product Features

- Advanced video processing technology to improve video quality.
- Advanced digital noise reduction.
- Advanced color edge enhancement.
- Adaptive static detect de-interlacing.
- Full screen, true color display.
- Double scan conversion and automatic pull down detection.
- Dynamic frame/scan rate conversion.
- Accept all PAL/NTSC standards.
- Easy operation with one button to select signals coming from composite VIDEO, S-VIDEO, or YCbCr.
- Easy on screen display operation with hot key on the IR control.
- Easy to use RS-232 protocol

3.4.7 RS-232 protocol

The communication is at 9600, no parity, 8 bits, 1 stop.

- 1) [ZOOM]: Zoom the image vertically and horizontally to switch between ratio 3x4 and 16x9.
Feedback [OK] after command is executed
- 2) [HUE]: Adjust hue.
Feedback [OK] after command is executed
Hue can be adjusted in two ways:
 - a) [HUE+] or [HUE-] increase/decrease hue level
 - b) [HUE] [+][+][+][-][-][-] select hue and then adjust level
- 3) [COLOR]: Adjust color
Feedback [OK] after command is executed
Color can be adjusted in two ways:
 - a) [COLOR+] or [COLOR-] increase/decrease color level
 - b) [COLOR] [+][+][+][-][-][-] select color and adjust level
- 4) [BRIGHT]: Adjust brightness
Feedback [OK] after command is executed
Brightness can be adjusted in two ways:
 - a) [BRIGHT+] or [BRIGHT-] increase/decrease brightness level
 - b) [BRIGHT] [+][+][+][-][-][-] select brightness and adjust level
- 5) [CONTR]: Adjust contrast
Feedback [OK] after command is executed
Contrast can be adjusted in two ways:
 - a) [CONTR+] or [CONTR-] increase/decrease contrast level
 - b) [CONTR] [+][+][+][-][-][-] select contrast and adjust level
- 6) [SHARP]: Adjust sharpness
Feedback [OK] after command is executed
Sharpness can be adjusted in two ways:

- a) [SHARP+] or [SHARP-] increase/decrease sharpness level
- b) [SHARP] [+][+][+][-][-][-] select sharpness and adjust level

- 7) [MODE] Mode Resolution for interlaced input. Alternates between different output resolutions.
Send command one time to show current resolution; send command two times to switch between resolutions.
Feedback [OK] after command is executed

<u>RGB Video</u>	<u>Component Video</u>
640x480	480p
800x600	720p
1024x768	1080i
1280x1024	

- 11) [INx]: Select input:
Feedback [OK] after command is executed
x=0 to select S-video input
x=1 to select Video input
x=2 Select Component Video input

- 12) [VER]: Return Software Version
Ex: [VER] will return [VER1.0]
