

Benefits:

- ▲ Made of 1/2' MDF; covered with black ozite and supported by two Plat Foam runners surrounding a Studio Foam center strip.
- ▲ Decouples sound source from the floor, resulting in greater audibility and clarity.
- ▲ Helps improve sound transmission loss.
- ▲ "Tighten" and increase sonic detail of your source. Hear more clarity and consistency of low frequencies and effects.
- ▲ Maximize the tone of your favorite amp!
- ▲ Lightweight and portable - comes with convenient handle pre-installed.
- ▲ One standard size fits most guitar and bass amp configurations.

Gig & Recording Amp & Monitor Modulation Attenuator.

Applications:

- ▲ Guitar amps; bass amps; live sound and home theater subwoofers; under Dj turntables; under stage monitors.
- ▲ Great for recording studios; church and club gigs.
