

## Introducing the Mobile Absorptive Expandable MAX-Wall by Auralex.

It's everything you've always wanted from your acoustical treatments! Affordability. Portability. Expandability. Adaptability. And a cool, upscale look that not only says "I've arrived!", but "Boy, I'm smart and I sound better than ever!"

### Need To Move Fast? Get Smart. Get The MAX-Wall!

The MAX-Wall is the perfect solution if you're in a rented space and don't want to—or can't—mount anything to your walls. Or, if your place needs to serve a variety of acoustical purposes. Or if you're on a budget and have acoustical problems that can't wait. Or if you're the sort who likes to mix things up on the fly. MAX-Wall will keep pace with your busy schedule.

### Turn "ANY" Room Into A Temporary Performance or Mixing Venue. Hear Today. Gone Tomorrow!

The MAX-Wall's proprietary, patent-pending design offers excellent broadband control of sound waves throughout your room AND in the nearfield, so now you can play, record or mix great music or vocal tracks ANYWHERE at ANY TIME!

### We Designed MAX-Wall With Room To Grow

The interlocking MAX-Wall system is made to grow....and grow....and grow as your needs change. It can just go on and on and on—but only if you need it to. Don't buy more than your place requires... and don't bankrupt your pocketbook when a simple MAX-Wall system might be all you need! You want modular? MAX-Wall's your answer! Add our Sunburst-360s or some of our new stand-mounted LENRD Bass Traps and you've got an incredible amount of acoustical control in an attractive, portable package. And it can go anywhere with you!

### Set Yourself Apart From The Crowd

The MAX-Wall panels are thick enough to yield a pretty high degree of sound containment, so a couple boxes of them can be used to set up—in a flash!—a temporary pseudo-iso booth. Will it yield total sound isolation? Heck no. But it'll give you enough containment so that you can lay down a clean new track....in a hurry and probably without having to monitor on headphones.

### It Doesn't Get Any Easier or More Affordable Than This

You can unbox and set up your MAX-Wall in a matter of minutes—no tools, no adhesive, no fuss. And the MAX-Wall is INCREDIBLY affordable! We could've called it "The Acoustical Holy Grail"!

### Can you say, Home Theater In-A-Box?

Even in a rented apartment or home, with just a couple of boxes of MAX-Wall, you can finally experience your DVDs the way the Director intended! Surround yourself with MAX-Wall for the ultimate home theater listening environment!

### Stand-Mounted LENRD

Here we show the stand-mounted LENRD at its default height of 6'4". It can be easily raised to heights  $\pm 8'$ , as seen to the right! Whatever your situation dictates the stand-mounted LENRDS help you fine tune your adaptable recording or listening environment.

### What are you waiting for—a new millenium?

Don't delay! Get to your favorite dealer and pick up a MAX-Wall system today!

#### Specifications:

*In a box you get (4) 2'x4'x4.375" MAX-Wall panels, 2 glossy black tripod-style stands and 2 bonus mic boom arms just in case you temporarily need another functional mic boom stand more than a MAX-Wall panel. We include an instruction sheet, but you won't need it 'cause the MAX-Wall is so simple to set up! The "default" height of the stand with the MAX-Wall panels on it is about 6'4", but if you need yours to be taller, call us. By the time you read this, we'll probably have an extension kit available at a reasonable cost. Also by the time you read this, we anticipate having available an affordable optional plexiglas window kit (as shown in a couple of the photos).*

### Floor To 6'4"

*in 30 Seconds Flat!*

By stacking 3 panels (vertically) on each stand, you can gain extra absorption and isolation from adjacent spaces. Excellent for use as gobos, vocal booths, office dividers or anywhere a MAXimum-Wall is needed!
