**INTRODUCING THE NEW AURALEX ACOUSTICS MAX-WALL™ SYSTEM**

(Indianapolis, IN—February 3, 2000) Auralex Acoustics introduced their new Mobile Absorptive Expandable MAX-Wall™ acoustical control system at the winter NAMM Show in Los Angeles. This versatile new room treatment is the latest innovation in controlling & absorbing unwanted room reflections.

Each box of MAX-Wall contains (4) 2'x2'x4.375" MAX-Wall panels and (2) tripod-style stands. You can unbox and set up the MAX-Wall in a matter of minutes: Just insert the MAX-Wall panels onto the stands and adjust to the height you need for the project at hand. The MAX-Wall assembles quickly & easily without the hassle of tools or adhesives.

The MAX-Wall's proprietary, patent-pending design offers excellent broadband control of sound waves throughout the room *and* in the nearfield, allowing you to play, record or mix great music and vocal tracks *anywhere, anytime*.

The MAX-Wall is the perfect answer for:

- ▲ those who rent & can't—or don't want to—mount anything to their walls
- ▲ spaces that need to serve a variety of acoustical purposes, including studios & home theaters
- ▲ the budget-conscious
- ▲ those who like to mix things up "on the fly"

Also available as an addition to the MAX-Wall system is the Stand-Mounted LENRD™ Bass Trap. This LENRD is 4' high (as compared to the 2' tall corner-mounted LENRD), can easily be raised to heights up to 8' or more, and is simple to set up. There are (4) Stand-Mounted LENRDs and (4) stands per box.

With the Auralex MAX-Wall and Stand-Mounted LENRD Bass Traps, you have an incredible amount of complete acoustical control in an attractive, portable package. Both items are available in all 12 Auralex colors.
