SonoSuede Pro™ System

As audio technology continues to evolve, sound control solutions must meet greater acoustical demands while maintaining aesthetic appeal.

The **Auralex® SonoSuede System** is a cost-effective complete do-it-yourself room treatment system ideal for any critical listening environment. The synthetic suede fabric-covered panels provide the acoustical performance and visual impact critical for today's applications.
The **SonoSuede System's** unique mounting blocks help you get the most out of your treatment by spacing the panels off the wall. The resulting air gap dramatically improves low frequency absorption and also offers a multitude of decorative options.

SonoSuede Pro				
Quantity:	Coverage:	System Color Options:	Fire Rating:	Mounting Hardware
