

COBRA System references

"I have to admit that when the COBRA arrived & I saw the size of the rig & only 2 amps, I was a bit sceptical that it would provide the necessary "grunt" to fill the room at the required levels, however, following a quick setup & test it was apparent that this rig was more than capable of providing the necessary level and coverage - all in all the Dynacord COBRA seems to be a great sounding, cost effective solution."

Neale Mace Entertainment Installations, NSW - 02 4324 3873

"We have used the system to great effect for several large rallies and for artists including Adam Brand, Marcia Hines, Graeme Connors and Machine Gun Fellatio. The speed with which the system can be assembled and the excellent preset tuning mean that side of stage mixes are a breeze. The system provides even, full bandwidth coverage outdoors to 50m and beyond."

Tony Hystek Action Sound, Sydney - 02 9764 6622

"The Cobra System at Mount Evelyn Christian Fellowship was purchased as a result of many years of frustration that resulted from the old PA system. The environment at MECF required a system that would cope with the demands of weekly church events, theatrical style productions, school concerts, rock & Roll and classical/choral events all in an auditorium that could only be described as "A little awkward." The Cobra was easy to operate and allowed less experienced engineers to achieve an acceptable standard of sound. One of the big advantages that we noticed from the Cobra was its feedback rejection. The Cobra has been a great solution for us with its excellent performance and ease of installation it stood out from the other alternatives in the price range."

Quenten Knoll Production Manager, Victoria - 03 9737 0007

"The Dynacord COBRA System has been a welcomed addition to our hire inventory. The system is stackable, quick and easy to set up for anybody, runs off two power amps and comes pre-patched for easy set up; and the most important thing, it's useful for a variety of indoor and outdoor applications. Our fussy corporate clients have been impressed with speed of set up and quality of sound. We have also received numerous compliments at outdoor shows regarding excellent coverage for the size of the system, allowing for much greater site lines. I'm considering purchasing a second system in the very near future. Total value for money as the price is very, very affordable. We can't go wrong with our COBRA System."

COBRA System references

"The cobra system sounds great travels well, and bangs hard for its price, The system size, volume and its dispersion makes it an ideal system for many medium sized venues and events. The amazing thing is that it's even coverage and smooth response makes it all too easy, add that to it's footprint and that it is ground stackable and flyable and you will know why we have 2 full systems in our hire inventory".

Simon Hunt AAA Productions, Perth - 08 9317 2055

"With regard to sound quality, transportability and ease of operation we couldn't be happier with the Cobra system. One client questioned that these speakers were delivering what he was hearing and when he saw the amp rack he truly believed we'd patched into the house system. The Cobra System has redefined efficiency. Anyway you look at it, the future is clear with Cobra."

Dave Dempsey, The Music Box, Sydney - 02 9797 1800

"This system is very compact, fool proof and displays a lot of the good characteristics that the big name line-arrays provide, for the price unbelievably wide and even dispersion with a very flat frequency response."

Grant Sassell FOH engineer - 0418852647

"Metrochurch is excited to have the Dynacord Cobra line array system. Dynacord has delivered a compact system that provides exceptional definition at any SPL, combined with unparalleled sound dispersion."

Hugh Thomson - 0421117113

"That system rocks mate! Talk about loud! It puts the metal in metallica...the hiss in KISS... the bark in BARNSEY...the boo in The WHO...Oh yes did I mention immaculate frequency response, pristine clarity, ease of set up and excellent value for money?"

Felix, The Roundhouse University of NSW - 0417 277 751
