

TELEX COMMUNICATIONS — HOUSE OF WORSHIP

the difference between mere clarity and pure inspiration

Be it a one-room mobile facility or a 10,000-person congregation, every House of Worship has a common goal: to be heard to the heavens. Loudly, and clearly. And nothing triumphs over poor and inconsistent sound better than a total audio solution from the world leader in audio and electronic products, Telex Communications and its brands: EV, Midas, Dynacord, Klark Teknik, RTS, and Telex.

For 75 years we've been responsible for the clarity of the world's most powerful messages, including Neil Armstrong's first steps on the moon, The Rolling Stones World Tours, the SuperBowl, and even the 2004 Olympic Summer Games in Greece. It's a matter of dedication — our team of engineers is driven to design unparalleled quality professional audio products. Not only are we comprised of the top brands in audio, we've worked tirelessly to ensure that every product in the Telex Communications family works seamlessly together as a complete audio system solution.

And now we'd like to apply our expertise to your message.

What follows are just a few of the success stories from our House of Worship audio solutions, as well as a look at some of the audio components that may be right for you. From microphones and loudspeakers in the worship area, to audio duplication machines in the office, to the mobile system used for outreach events, we can provide whatever it takes to meet the needs in your facility.

To learn more about the audio solutions we provide, call 1-800-392-3497 to speak with an audio specialist or visit www.telex.com/how.

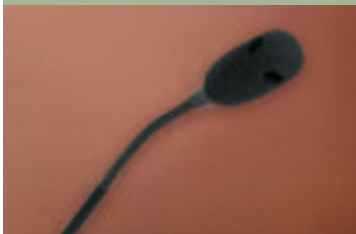

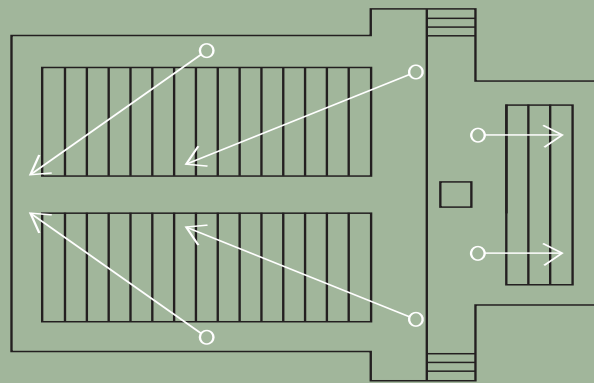

solving audio in waves

“We were in a spot where our congregation was rapidly growing, but as a smaller church, we simply didn’t have the budget to take an ‘all-at-once’ approach. So we’ve been doing it in waves. Not only have the results been practically unbelievable in terms of sound clarity and definition, we’ve consistently been well within budget. We’re finally ready to replace the final few system components so we have the total package, and we have a trusted partner who has been with us for the span of our journey.”

Gordon Miller – *Sound Engineer*
Colonial Hills Baptist Church, Tyler, TX

MICROPHONE
EV POLARCHOICE

The EV PolarChoice podium microphone features a gooseneck stand and multiple settings for various audio input patterns. So one, two or three people can be heard comfortably at one time.

MIXER
MIDAS VENICE

All the essentials for mixing without the complexity of a larger console. It has excellent flexibility and delivers large-format sound quality in a compact package.

AMPLIFIER
EV Q66

One word sums up this amplifier: reliability. No more worries about insufficient power causing problems throughout the entire sound system.

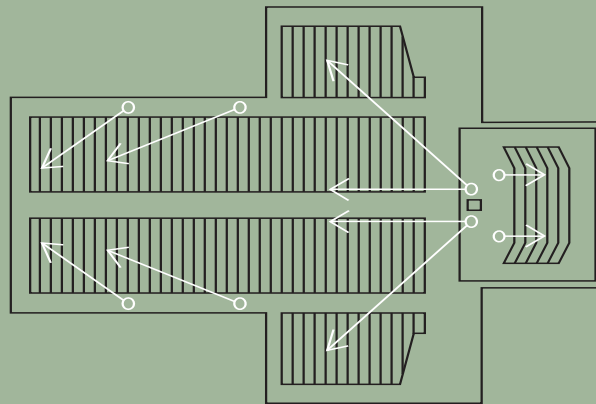

LOUDSPEAKER
EV FRI

The EV FRI delivers precise coverage and versatility for your worship space, allowing even sound distribution to each listener.

plugging into hearts

“Our church offers both contemporary and traditional services. During our contemporary services, we feel it’s our call to form an emotional connection to our worshippers through music, just as we do through the spoken word. What we needed was a sound solution that really took into account what we want to accomplish vocally and instrumentally. The result was a more energized room, and really an out-and-out spirit of celebration during the service.”

Peter Greenlund – Media Director
Wooddale Church, Eden Prairie, MN

MICROPHONE EV N/D367s

Along with comfortable handling and rugged durability, the EV N/D367s microphone has excellent sound quality suitable for vocal performance and speech.

MIXER MIDAS VERONA

The Midas Verona features expanded versatility: 8 buses and multiple frame sizes to accommodate the needs of a growing congregation.

AMPLIFIER EV CPS

This is the ideal solution for consistent, clean audio signal amplification. The CPS family is extremely flexible and a perfect solution for your needs.

LOUDSPEAKER EV QRx

EV QRx loudspeakers provide concert-quality audio at a non-concert price. The QRx family has been designed to meet the diverse needs of houses of worship, whether the application is mobile audio or permanent installation.

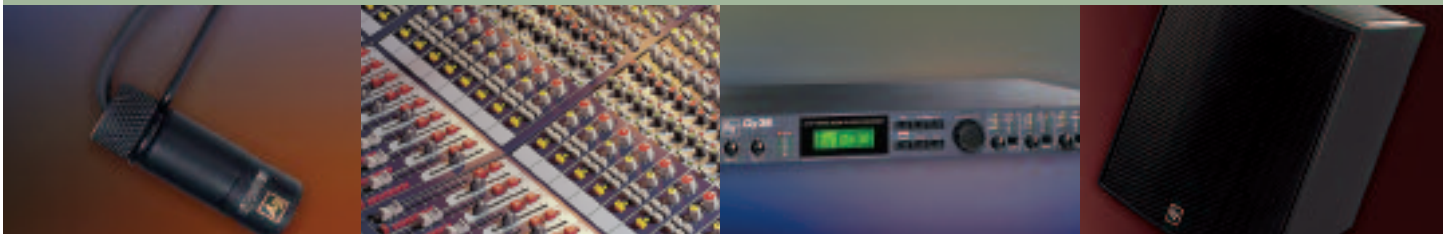

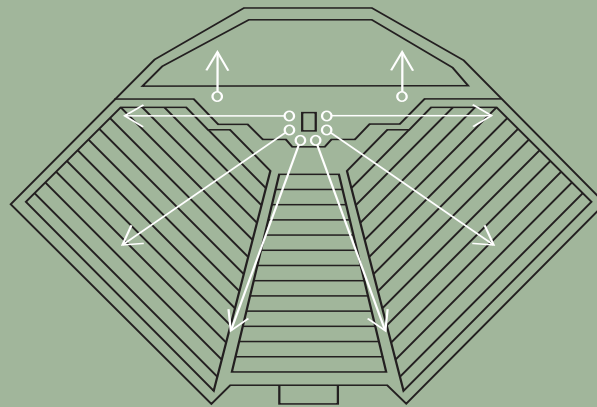

every component of a worship experience

“Finally, the words are intelligible. The music stirs the heart. And every audio and video component works seamlessly together to project a worship experience we never thought possible. And to have every seat in the house covered with clear sound is nothing short of amazing.”

Rick Myers – Associate Pastor
Harvest Assembly Church, Lakeland, FL

MICROPHONE EV RE92H

The EV RE92H is a small, high-quality microphone designed to mic a choir for situations that require suspension of a microphone above a sound source. It provides clear and transparent sound while effectively blending into your environment.

MIXER MIDAS LEGEND

The Midas Legend is a tri-purpose console that can function as a stand-alone front-of-house or monitor console; yet, if needed, the Legend can handle both duties simultaneously with one operator.

PROCESSOR EV Dx38

The Dx38 provides sound systems with the standards for digital sound signal processing. Its user-friendly design reduces the complexity of digital signal processing to an easy-to-use format.

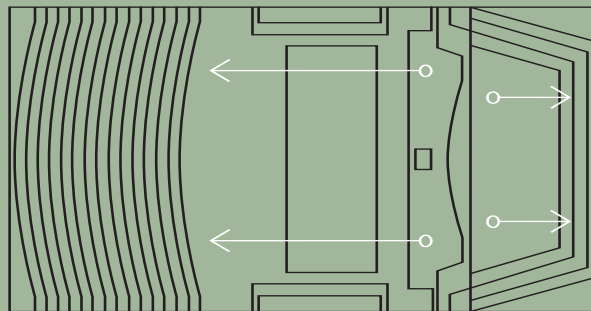

LOUDSPEAKER FRX+

FRX+ loudspeakers are designed to produce excellent sound in larger room formats. By effectively controlling sound patterns, FRX+ loudspeakers increase speech intelligibility and musical clarity in critical reverberant spaces where excellent directivity control is mandatory.

from isolation to invitation

“We were asking ourselves: how do we possibly restore a sense of ‘oneness’ in a facility that’s grown to this scale? The best answer was to take a 360° approach to our audio needs. To address the sound in every corner of every room. It had a dramatic impact! It’s amazing how sound quality can either leave you isolated or invite you in. Seeing as how we’re in the invitation business, we couldn’t have made a better decision.”

Wes Hartley – Media Pastor
Lake Pointe Baptist Church, Rockwall, TX

MICROPHONE
EV RE1 DUAL

The highest level of wireless microphone available in terms of sound quality, programmability, features, and ease-of-use for house of worship broadcast facility applications. It ensures a flawless performance every time and eliminates any sound drop-outs or RF interference.

MIXER
MIDAS HERITAGE

The Midas Heritage is the ultimate in professional mixing consoles. The Heritage Series provides all of the features for large-scale productions in critical real-world settings.

PROCESSOR
KT DN 9848

The KT DN 9848 brings a new level of versatility to system control whether for live production or installation use. It is the ultimate in equalizing, dynamics and control.

LOUDSPEAKER
EV XLC

XLC compact-format line-array loudspeakers provide seamless sound coverage in a variety of room sizes and shapes, including the largest venues and arenas. Whether a member of the audience is in the front row, middle seats, far back of the room, or balcony — they will always hear the same, consistent sound.

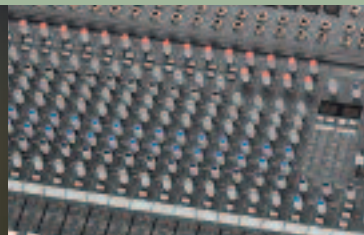

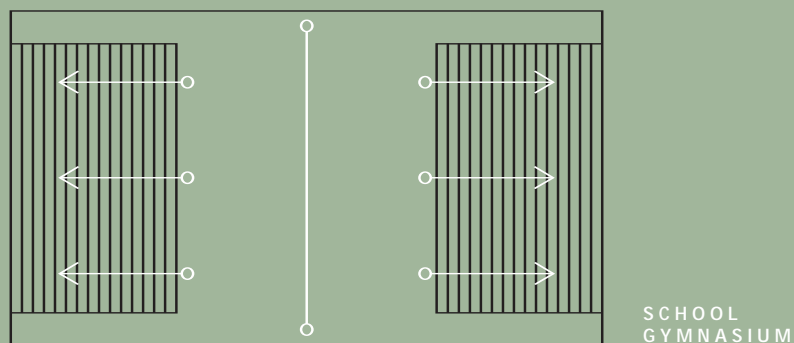

perfect sound on any scale

“Someday we hope to have thousands in our congregation, but right now we are small and growing. That means we have to be mobile. One week we might be setting up worship in a school gymnasium and the next in an auditorium. So, this sound system is perfect for us. It’s easy to move, quick to set up, and the sound is very reliable.”

Mel Taylor – *Music Pastor*
Lake Sawyer Christian Church, Covington, WA

MICROPHONE EV N/D767a

The EV N/D767a features excellent sound quality, reliability, and is extremely versatile for both spoken word and dynamic singing in fixed installations and portable applications.

MIXER DYNACORD POWERMATE

The Dynacord PowerMate family of powered mixing consoles brings the user more power, effects, and features in a single package than systems three times its size. Ideally suited for any mobile application.

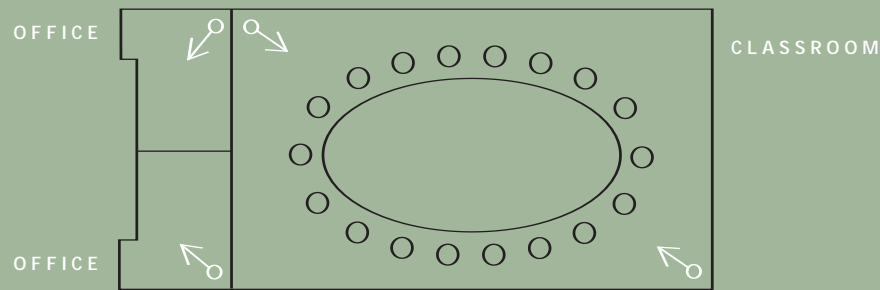

LOUDSPEAKER EV SX300

The world’s best-selling molded enclosure loudspeaker has proven its performance around the globe for over a decade. It continues to offer users unparalleled versatility and performance in a durable and portable package.

spreading the message room by room

“We have an excellent sound system in our worship hall, but just as important are the audio components we use throughout the rest of our building. From the EVID loudspeakers in the classroom, fellowship hall and sanctuary to the CD/DVD duplicator in the main office—we have all the means we need for the communication that is vital to our community.”

Rev. LaBarron F. McAdoo, Sr. – Senior Pastor
Union Baptist Church, Wilmington, DE

INTERCOM

Telex and RTS offer the widest range of hard-wired and wireless intercom products in the world. From simple party-line intercom to multi-venue matrices, we can accommodate the intercommunications requirements of any size venue, including contemporary house of worship broadcast facility needs.

EVID LOUDSPEAKERS

Sonically outstanding and suited for any room in your facility, EVID surface-mount and ceiling loudspeakers are easy to install and deliver superb sound. And with a range of compact loudspeaker options, you'll find a solution for any installation requirement.

ASSISTIVE LISTENING TELEX SOUNDMATE

Telex SoundMate is a personal listening system that enables hearing impaired listeners to effectively and comfortably hear your message. Systems may also be used for translation.

DUPLICATION

Telex manufactures a premium line of cassette, CD and DVD duplication devices for recording and broadcast applications in the contemporary house of worship. Telex duplicators maintain cutting-edge status in terms of speed, efficiency and reliability.
