

N/DYM[®] Instrumental Microphones

PROFESSIONAL
A U D I O
P R O D U C T S

The new series of N/DYM wired microphones were designed to meet all of your performance instrument mic'ing requirements. From the new versatile N/D478 universal instrument/vocal microphone to the specialized N/D468 and N/D868 models, EV offers you the best in sound and reliability.

- **The N/D478 universal instrument microphone is an excellent choice for mic'ing drums and guitars. It also features VOB (vocal optimized bass) technology designed to give clean, clear sound at low frequencies by controlling the "proximity effect" bass boost, which allows the N/D478 to double as an excellent vocal microphone.**
- **The N/D468 is designed specifically for musical instruments from brass to drums, with an extended frequency range that provides accurate response even in high sound pressure levels. In addition it's unique pivoting design allows for optimum positioning and more flexible use.**
- **The N/D868 is designed to handle incredibly high sound pressure levels without distortion. It's extended low-end guarantees the most exciting sonic reproduction possible in a bass drum mic.**
