Eliminator kW Dual 18" Subwoofer

What It Is

► The Eliminator kW is **one kick-ass, dual-18, direct-radiating sub**. We tuned the enclosure to 38 Hz! You said you wanted some thunder!

Who's Interested

- **DJs** who need better low end and punch on the dance floor.
- **Bands** looking to expand their system and increase performance.
- **Clubs** who know they do better business when the bass is thumping.

Key Selling Point

► The Eliminator kW is a **brand-new, high-performance, value piece** that delivers 1000 watts of power! We designed a custom woofer for this one, just so you can slam it a bit.

No-Bull Benefits

- **We made the vent huge** and placed it mid-box. You can hear it work. You can hear it's better.
- The Eliminator kW is **well-behaved and smooth** all the way down.
- We put **sealed pocket wheels** on it so you don't have to strain your back
- Turn it on! You're not used to this kind of performance at this price point!

Frequently Asked Questions

- **Q:** "Is that a 4-ohm box?" **A:** Yes, it is.
- **Q:** "Did you get me a painted finish?" **A:** Well, polling actually showed that for this app, carpet covered is the way to go. Watch for a nice high-power painted sub next year, or check out the QRx218S, which is loaded with EVX180Bs!

► **Q:** "Does that come with a stand mount and pole?" **A:** Sure did. We include an 18-inch pole so you don't have to scramble when you need to get it over their heads.

Competition

► **JBL, EAW, Yamaha, Sonic, Peavey.** But when you listen, you'll like ours better.

Use With These Fine EV Products

- The P2000 amp is a good match for the Eliminator kW.
- Eliminator or Eliminator i and the Eliminator/Q66 amp for tops.*
- T251+s and the Eliminator/Q66 amp: alternate tops
- ACONE

At EV, we make the loudspeakers and pro audio gear you need every day.

Now, turn it up!

* The Eliminator i amp is not meant to be used in a system with the kW. It is tuned to work in a complete system with the Eliminator i and Eliminator i Sub.
