

Finally, ceiling speakers that **don't** sound like ceiling speakers.

Announcing the newest EVID™; ceiling loudspeakers that deliver the audio quality you'd expect from Electro-Voice®. Designed as a perfect complement to our EVID premium surface-mounted loudspeakers, the new EVID ceiling speaker line offers real solutions to everyday installation challenges.

We're proud to introduce three totally new models of full range ceiling speakers and a powerful, quick-mount ceiling subwoofer. Each model offers truly unique solutions to countless installation challenges. They all feature unmatched intelligibility and bandwidth. The flagship of the line is the EVID C8.2HC. Specifically designed for reverberant rooms and high ceiling environments, it features an **exclusive (patent pending)** waveguide coupled 8" two way driver packaged into a compact quick mount ceiling enclosure. Other models include a 4" two-way system, an 8" two-way system, and the powerful low-end performance of a 10" quick-mount ceiling subwoofer. All models are UL/NFPA rated.

Contractors will enjoy how fast and easy it is to install these speakers. And best of all, your customers will say, "They don't sound like ceiling speakers – they sound great!"

Hear them for yourself. Call for more information 1-800-392-3497.

EVID™

The **Intelligible** Choice for Ceiling Speakers.

Don't forget to combine the new EVID Ceiling speakers with the new Electro-Voice MA-1212 and 1206 mixer/amplifiers. The new MA series mixer/amplifiers are flexible and affordable, perfect for installations where great sounding audio is the requirement.
