

Clean up
muddy
bass with

VOB Technology

Only from **EV!**

Other microphones have bass that's downright filthy. They simply can't compare to **EV N/DYM** microphones with EV's new Vocally-Optimized Bass (VOB™) Technology. VOB™ gives musicians and sound engineers clear vocals to "cut through the mix" and deliver spotless sound.

VOB™ Technology is only available in **EV N/DYM** microphones. With three VOB™ models to choose from (N/D767, N/D267 and N/D478), you'll find the perfect vocal or universal microphone for squeaky-clean bass and genuine sound.

EVERYWHERE™
