

Why Buy an EV N/DYM Wireless System

Just the Facts!

What are the benefits of N/DYM Wireless?

- Professional performance with **10 channel UHF frequency agility**
- **ClearScan™ Auto Channel Select.** In a matter of seconds, ClearScan™ finds the cleanest of the 10 available channels, taking the guesswork out of frequency agile system set-up.
- Rugged & durable **metal receiver housing**
- Great sound with **N/DYM Wired mic elements** in all handheld transmitters
- **Quick system set-up:** fixed front panel mount antennas & ClearScan™
- All this at a **great price**

The following seven systems are available:

- NRU-N7 Handheld transmitter (N/D767a)
- NRU-N2 Handheld transmitter (N/D267a)
- NRU-N1 Handheld transmitter (N/D167)
- NRU-L10 Bodypack transmitter w/ OLM-10 omni lav mic
- NRU-L20 Bodypack transmitter w/ ULM-20 cardioid lav mic
- NRU-H1 Bodypack transmitter w/ HM-2 headworn mic
- NGU Guitar system w/ bodypack transmitter

Individual components are also available

What is ClearScan™?

- ClearScan™ is the latest in wireless technical innovations from EV.
- One button operation
- ClearScan™ automatically scans the airwaves and quickly selects the best of 10 UHF channels.
- Eliminates guesswork of frequency agile channel selection and system set-up
- Worry-free wireless performance.

What's new with N/DYM Wireless

- Second band of frequencies – B Band
- Enables operation in areas where A Band frequencies are not available
- Second band of frequencies also increases the total number of systems possible in a single installation.
- Now possible to get up to 7 systems running in a single installation.
- Maximum number is (as always) dependant on the availability of the necessary frequencies in the location where systems are being used.

Components now available

- All system transmitters now shipping as components. These include the NHTU-N7, NHTU-N2, NHTU-N1 handhelds and the NBPU bodypack and the NBPU-G guitar bodypack.
- Including the new NHTU-N7 with the 767a dynamic element.

N/DYM Wireless promo campaign

- Ads now running in four publications: DJ Times, LiveSound, Gig & Church Production. The ad features ClearScan™ and it's benefits.
- New POP display.
- ClearScan™ T-shirts.
