QRX Loudspeakers for Mains, Monitors, or Install

What It Is

► QRX is used for demanding music and install applications. Ground stack or fly them. These are premium loudspeakers. Ask the folks who've heard them, use them, and are doing well by them. These are high-SPL, high-octane rock boxes!

Who's Interested?

► Clubs and installs (including churches), regional touring bands, festival road shows, outdoor regional events, regional sound companies, rental houses.

Key Selling Point

► QRX are high-performance, versatile, compact, all-in-one cabs. We've put some of our current best drivers and components in them. You get the benefit of better networks, EVX180Bs, and the already infamous DH7. One listen to this new, very smooth three-inch is all you need.

No-Bull Benefits

- **Ring-Mode Decoupling** (RMD™): It's in both drivers! You notice clean, in-your-face, full-bandwidth power.
- **Rigging is L-Track**, everything included, even the clips.
- **Components are new!** Check out that DH7. You'll love what you hear!
- Looking for **flexible boxes that take up less space?** You just found the answer!

Frequently Asked Questions

► **Q:** "I've noticed your prices are \$100 to 200 lower than some others I'm looking at. Can the QRX really be better?" **A:** Yes, it really is! Ask any A-tour engineer or pro installer who's using our

gear! It's just that we're pricing things right for you, whatever your situation is.

► **Q:** "I do a lot of church hangs. Am I going to be able to get QRXs in white or unfinished?" **A:** They don't show on the price sheet, so you'll have to give us a call. But if that's what you need, we'll get them to you!

Competition

► Mostly JBL and EAW, but please listen to ours. You'll hear the difference right away.

Use With These Fine EV Products

- Q44 with QRX112/75
- Q66 with QRX115/75
- P2000 with RQx212/75 and QRX118S
