COBALT™ SE60

Introducing the Cobalt™ SE-60 condenser microphone, a hot new microphone from the leader in sound communications.

Development of the Cobalt SE-60 started with working professionals in mind. From live sound applications to small recording rooms, the need for a durable, accurate and cost-effective condenser was apparent.

Fourteen months of harsh live and critical studio testing was incorporated. Everything was included, from the quiet strains of an oboe in studio and capturing cymbal work over a drumset, to holding up in the face of a raging guitar amp in some of the loudest clubs we could find. The SE-60 rose to the challenge exhibiting warm lows, transparent highs and the ability to handle sound pressure levels in excess of 140dB.

With a nod towards the beauty of classic microphones, we finished the SE-60 in a beautiful and durable cobalt finish, one that will look and feel good in your studio as well as take the hard knocks at the gig.

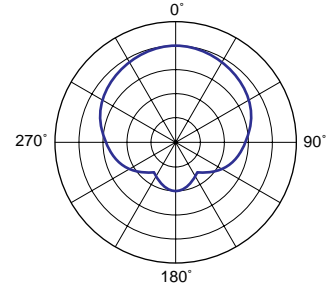

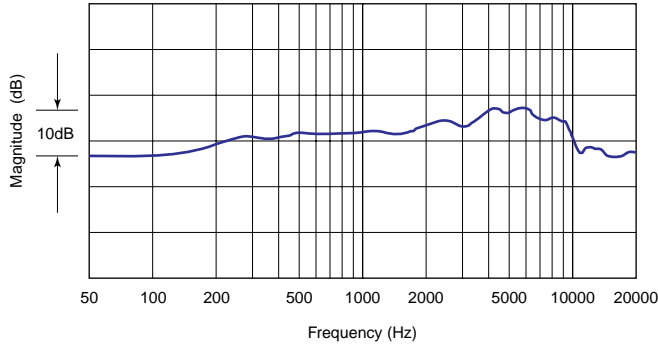

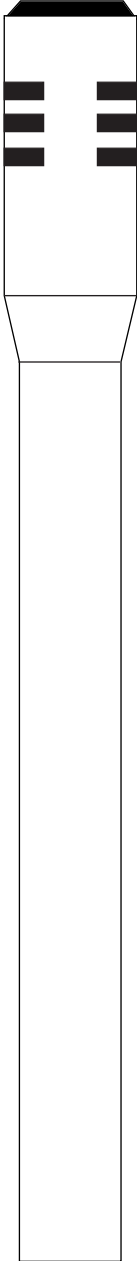

It doesn't end there—price was a major consideration. After all, once you own one Cobalt, you're going to want another and we've made that easy.

Contact your Telex representative today for a test listen (you'll want to hold it too!) or call 800-392-3497 for the nearest Telex dealer in your area. Your ears and your accountant will thank you.

Specifications

Cobalt SE-60

Part Number	71213-000
Directional Pattern.....	Cardioid (uni-directional)
Type	Permanently charged, back plate condenser
Frequency Response	30-19,000 Hz
Impedance	600ohm
Sensitivity @ 1k (0db=1V/Pascal)	
Phantom	-50dBV
Battery	-52dBV
Weight	8.8 oz.
Battery	AA alkaline
Battery Life	1000 hrs. +
Max SPL	
Phantom	141dB
Battery	137dB
