

Telex®

TD Series Microphones

With over 25 years of providing live sound, recording and sound reinforcement microphones, Telex brings you the new TD Series of dynamic microphones.

With the **TD-26** Hyper-cardioid, there are no compromises to your sound. From its satin tapered, stylish housing, to its smooth roll over the low frequencies and transparent highs, this mic is specifically tailored for the professional vocalist.

The **TD-22** brings classic styling and a familiar sound to your show with a gentle rise in the mid-ranges that really pulls your vocal out and above the mix. You'll find this mic equally comfortable in front of amplifiers in any room.

The **TD-16s** finds itself in the workhorse position with a tapered low end and a pronounced bump in the mids getting your voice over the loudest of situations. A full 1/2 inch of rubber protects the element from even the roughest of abuse and an on/off switch is provided when you don't want to be heard.

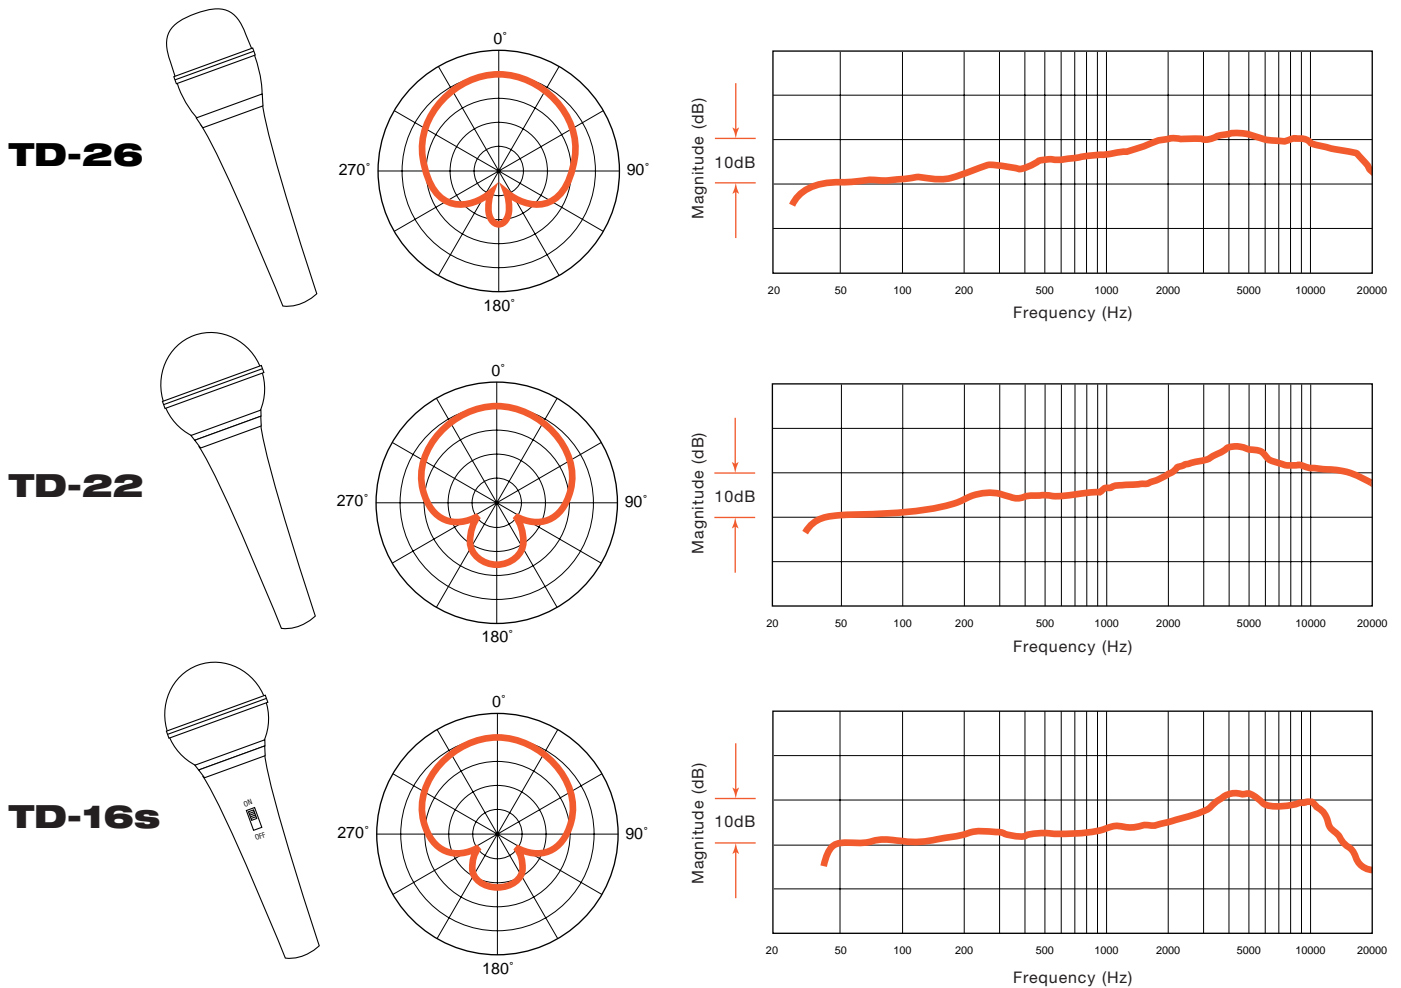

All TD Series microphones are encased in rugged, die-cast housings with electroplated finishes for the ultimate in durability.

Contact your Telex representative today or call **800-392-3497** for more information.
