CUSTOM

anyway you want.

We'll put them together

TAILOR-MADE

"Can we get X-Array" floor monitors in a weatherproof enclosure for an outdoor theme park stage?"

"Well, the FRX-640 would work great, but the enclosure can't be more than 24 inches deep, and I need recessed Speakon" connectors in back."

"I've got a club application that needs extremely high output, full-range speakers, with wide coverage, and painted fire engine red."

No

Introducing

**Electro-Voice®
Tailor-Made™
Loudspeakers:**

An incredible range of Electro-Voice® speaker solutions that you won't find in any Electro-Voice® catalog.

Our Tailor-Made™ speakers are custom engineered and built for very specific audio, architectural, and aesthetic applications.

We work with pro audio consultants and contractors to either develop new speakers from scratch, or modify existing Electro-Voice® products.

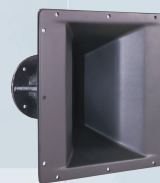

Either way, our Tailor-Made™ speakers mean that you don't have to compromise on less-than-perfect.

Perfect is just an order form away.

100% Custom, 100%
Electro-Voice®

Electro-Voice® Tailor-Made™ speakers begin with our dedicated Tailor-Made™ team: Sales reps, engineers, product managers, manufacturing supervisors and their talented craftspeople who all work together to make custom orders happen. These people have a passion for audio excellence.

They'll consider every aspect of your Tailor-Made™ order. How big is the venue? What dB level do you need at what distance? What coverage pattern is required? The team works with you to ensure that every detail is covered, and the final design meets your approval.

Tailor-Made™ speakers are pure Electro-Voice®, inside and out. They're built with the same superb EV® transducers that go into

our regular production speakers: Smooth, efficient woofers, precise high-frequency horns, and world-class extended frequency compression drivers contribute to the no-compromise performance of your Tailor-Made™ speakers. We wouldn't trust components from anyone else.

It all comes together at our speaker manufacturing facility in Morrilton, Arkansas, where your Electro-Voice® speakers are made. While your Tailor-Made™ speakers are custom engineered and built, they're still Electro-Voice® speakers, pro audio's most respected brand for nearly 75 years.

We use only Electro-Voice® components.

Where Custom Is Routine

Every audio installation is *different*. Every theater, auditorium, concert hall, house of worship, arena, cineplex, theme park, nightclub, shopping mall, and lecture hall is *different*. They all have very specialized sound reinforcement requirements. This is business as usual for pro audio consultants and contractors. And now, it's routine for the Electro-Voice® Tailor-Made™ team as well.

We welcome your custom orders. We're dedicated to helping you deliver the sound system your clients want but never thought they'd get. All you have to do is call us (or email or fax) and put in your order.

Your ideas never sounded
