

You know the situation; you've been there. Front of house fighting monitors, monitors fighting front of house. The sound in the room is getting out of control; the vocals are disappearing but you can't get any more level. Someone needs to take charge. That someone needs to be you.

Until now there hasn't been an easy solution. Let us introduce you to the Midas Legend 3000. One person, one board equipped to do the job.

Legendary Midas XL4 equalization.

Midas XL4 pre-amps: the most respected in the business.

Digital assist 500-scene snapshot memory.

Separate faders and equalization for FOH and monitors.

10-VCA.

Separate mute switches for FOH and monitors.

All the bells and whistles you've dreamed about.

For a complete breakdown of how your mixing experience can be enhanced, visit Midas in Booth 1747.

Remember, if it isn't a Midas, you're missing out on the most favored console technology (as chosen by the majority of top ten touring acts last year).
