ClearOne®

CONFERENCING PRODUCTS GUIDE

how many conferencing systems do you see in this picture?

ClearOne now has the best portfolio of audio conferencing solutions for a complete range of applications

When you drive around your city and look at corporate offices, schools and other buildings, do you imagine how many places need AV communications?

Well, you have now become a seasoned AV solution provider. You're able to master the integrated room with XAP and Converge.

Beyond the installed boardroom and main conference or training room, there are some straight-ahead rooms and now even desktops, where you can place RAV, MAX Attach, MAX Wirless or the new MAX IP and Chat 50.

A multitude of rooms are out there for table-top conferencers like MAX Attach (wired for up to four daisy-chained units and Wireless - now with up to two pods working together.) If you mine your accounts you will soon find, not only those incremental additional rooms, but also the opportunity for a fleet sale of multiples. ClearOne gives more margin and better features than the Polycoms available everywhere on the net, with phone companies and so on.

how many conferencing systems do you see now in this picture?

• **XAP**- The most advanced processing product in the industry. Now on version 5.0.6, it has been constantly refined and improved. Unit linking allows designers to create a large cross-point audio routing matrix. While the processor is highly configurable, the interface to do so is the easiest and fastest you can find.

• **CONVERGE**- This new mid-priced unit allows you to apply it where 6 or 9 mics are required. It's like the RAV processor with more. Select your favorite types of mics from wireless to goose-neck to table mics. A set-up wizard makes this a very quick implementation.

• **RAV**- 6 and 9 mic systems of complete bundled packages that have dedicated 360 degree mics and optional ceiling or wall/table-top speakers.

• **MAX Attach & EX**- Wired MAX handles the simple department meeting space where one pod or 2, 3 & 4 linked together can provide the step-up from clipping, non-duplex speaker phones.

• **MAXWireless & MAX Attach Wireless**- Get cables clutter off the table and give your customer freedom to use the conferencer where ever they want to. The Attach version now gives you two wireless units for more coverage.

• **MAX IP**- designed to work for the company that's made the change to a VoIP phone system.

• **CHAT 5** - the ideal personal conference unit that interfaces to PC, phone & even your iPod.

• **Microphones & Mic Bundles**- The best selection of conference mics are now packaged with XAP & Converge

• **Pro Sound Reinforcement**- The PSR packs a lot of audio DSP processing in a great value, using the same familiar interface engineers know with the XAP line.

• **Furniture**- You're writing the electronic equipment for the room, add needed furniture for it too.

ClearOne **WIRELESS TABLE-TOP CONFERENCERS**

POLYCOM, YOU'VE GOT A CHALLENGER ON LINE ONE

MAX™ Wireless
Part# 910-158-001

- 150 foot wireless signal range
- Up to 8 hours of talk-time
- Distributed Echo Cancellation®
- Dual function power supply / charger included
- Automatic power-save mode
- 360° microphone coverage
- 2.4 GHz WDCT operation range

The MAX™ Wireless offers superior ClearOne-signature quality in a portable, wireless unit. Simply plug in the base and use the phone in any room within signal range. The wireless design creates a clean look, removing the wires and cords that can be tripped on or run over with chairs. It features Gentner® Distributed Echo Cancellation®, noise cancellation, advanced audio processing, and full-duplex performance so you can count on clear, highly intelligible audio for effective, interactive conferences.

MAX™ Attach Wireless
Part# 910-158-070

- Dual-phone configuration provides outstanding mid-sized room coverage with multiple microphones and loudspeakers
- Digital spread spectrum provides completely secure conferencing
- 150-foot wireless signal range allows use in multiple rooms without moving the base unit
- Up to 12 hours of talk-time lets you conduct lengthy conferences without recharging
- Dual-function power supply/ charger enables you to continue your conference while charging
- 4-hour charging time quickly prepares phone for its next conference
- Automatic power-save mode

Wireless conferencing phone (WDCT 2.4 GHz, US Version) MAXAttach Wireless brings you ClearOne's industry-leading, professional audio technology for crisp, clear sound in an easy-to-use conferencing system with two wireless phones for expanded room coverage

ClearOne. TABLE-TOP AUDIO CONFERENCERS

MAX™ Attach
Part# 910-158-055

The MAX™ Attach comes packaged as two phone units and a single base unit for medium conference rooms. It is also available in 3-phone and 4-phone kits.   Link up to four complete phones (not just microphones) for expanded coverage with MAX EX Expansion Kits.
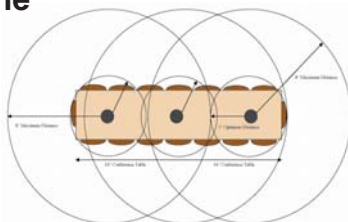

Divide MAXAttach into multiple phone systems for use in separate rooms with MAX EX Expansion Base.
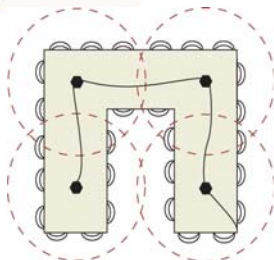

It features Gentner® Distributed Echo Cancellation®, noise cancellation, advanced audio processing, and full-duplex performance. You can count on clear, highly intelligible audio for effective, interactive conferences. Automatic level controls keep participants' audio balanced and consistent. First-mic priority eliminates hollow "tunnel" sound by activating only the microphone closest to the person speaking.
.

• Comes with two phone units and a single base
• Up to 8 hours of talk-time
• Distributed Echo Cancellation®
• 360° microphone coverage

ClearOne. TABLE-TOP AUDIO CONFERENCERS

MAX™ EX
Part# 910-158-015

- Gentner® Distributed Echo Cancellation
- Noise cancellation
- Full duplex - enables participants to speak and listen at the same time
- Automatic level control — keeps participant audio balanced and consistent

The MAX™ EX is unique in its expansion capabilities. It allows for additional phones to be connected, not just microphones. This creates an even distribution of microphones, loudspeakers, and controls for better sound quality and user access. Max EX features Gentner® Distributed Echo Cancellation®, noise cancellation, and advanced microphone activation process. Add these to its simple setup and you've got the perfect conferencing solution for virtually any size group.

MAX™ EX Expansion Kit
Part# 910-158-050

- Gentner® Distributed Echo Cancellation
- Noise cancellation
- Full duplex - enables participants to speak and listen at the same time
- Automatic level control — keeps participant audio balanced and consistent

The MAX™ EX expansion kit allows the user to EXPAND the Max EX. Up to 3 expansion kits can be added to the original MAX EX for a total of 4 units. MAX EX features Gentner® Distributed Echo Cancellation®, noise cancellation, and advanced microphone activation process. Add these to its simple setup and you've got the perfect conferencing solution for virtually any size group.

STARIN™

ClearOne. VoIP TABLE-TOP AUDIO CONFERENCERS
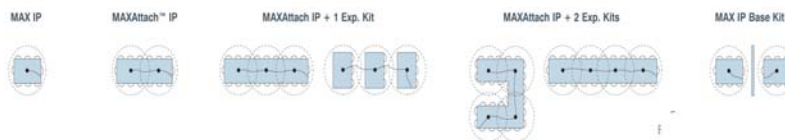

MAX™ IP
Part# 910-158-301

- Same quality features as all MAX
- Connect to a wide variety of SIP platforms
- VLAN tagging allows for bandwidth management & secure separation of voice & data networks
- 3-way calling allows for ad-hoc conferences without need for a bridge
- TLS & SRTP encryption-ready (with future release of firmware upgrade); secures voice communications over the network
- Field upgradeability - allows users to easily download firmware upgrades from ClearOne website and load directly into the conference phone

With MAX IP™ and MAXAttach IP™, customers with SIP-based VoIP systems can now enjoy outstanding audio clarity and superior room coverage, at a price point well below the competition. They allow customers to daisy-chain multiple phones together, up to a total of four. This provides multiple speakers, multiple microphones, and multiple dial pads distributed throughout the room for unrivaled coverage. In addition, these VoIP conference phones offer the advanced audio signal processing technologies that were originally developed for ClearOne's market-leading professional audio conferencing products.

two microphone pods and BOSE ceiling speakers, **wireless remote**

RAV™ 600
Part# 910-153-102
two microphone pods and BOSE wall-mount speakers, **wireless remote**

RAV™ 600
Part# 910-153-100
two microphone pod base system without speakers, **wireless remote**

- Ease of installation (IE:CAT5) provides lower cost and maintenance
- Ease of use- centralizes operational functionality through wireless or wired tabletop controller
- Familiar user interface that resembles a standard phone
- Connect to video or web conferencing
- Gentner® Distributed EchoCancellation® and Noise Cancellation.
- AMX/Crestron control system capable.
- Camera Control with VC systems allow Voice Tracking Mode to have camera presets triggered by microphone activation
- 2 year warranty

RAV is a complete, out-of-the-box audio conferencing system that includes an audio mixer, loudspeakers, microphones and a wireless or wired control device. RAV is a higher-quality alternative to standard pod conferencers and allows connection to video codecs, webconferencing and other AV devices like DVDs, VCRs, etc.

It features Distributed Echo Cancellation®, noise cancellation, microphone gating and a drag-and-drop graphical user interface for easy system setup, control and management.

RAV is available in two models, RAV 600 and RAV 900. RAV 600 includes an audio mixer with an integrated telephone interface and amplifier, a wireless or wired control unit, RAV-Ware™ software, and two RAV microphone pods comprised of three microphones each. RAV 900 adds an extra microphone pod to deliver optimal voice pickup in larger rooms. Both models include Ethernet control for remote management and configuration capabilities.

Systems can include two Bose® ceiling- or wall-mount speakers or have the RAV base alone for addition of your choice of speakers. The ampliffier is 10 watts.

ClearOne® INSTALLED AUDIO CONFERENCING

Converge™ 560
Part# 910-153-560

two distribution mic boxes for 6 mics, **wireless remote**

Converge™ 560
Part# 910-153-565

two distribution mic boxes for 6 mics, **wired remote**

- Distributed Echo Cancellation®, Noise Cancellation, First Mic Priority, Look-Ahead Gating, ClearEffect™, Adaptive Modeling, Chairman Override Mode
- Single speaker zone sound distribution allows amplification of presenter's voice in near-end room
- Camera control: Camera presets triggered by microphone activation with video conferencing
- Customize the audio settings and configure system via the built-in USB or Ethernet connection with drag-and-drop user interface.

The Converge 560 and 590 conferencing systems deliver optimum audio performance and configuration flexibility for medium-sized rooms requiring up to nine microphones, all at a price point hundreds or even thousands of dollars below competitive offerings.

Converge 560 and 590 allow customers to connect their preferred microphones, such as wireless, tabletop, button and podium using industry-standard XLR connectors.

Converge™ 590
Part# 910-153-590

three distribution mic boxes for 9 mics, **wireless remote**

Converge™ 590
Part# 910-153-595

three distribution mic boxes for 9 mics, **wired remote**

The Converge 560 and 590 distribution box transports microphone signals over a single Cat 5 cable back to the mixer via distribution boxes significantly reducing on-site wiring complexity and installation time. Converge 560 and 590 also include an intuitive controller for simple user operation, eliminating the need for more expensive control systems and delivering a much lower total system cost.

Improved features over the RAV platform include a new 3 PEQ from 20 to 15 KHZ and -15 to +15 dB is available, camera control has one preset per mic, a home (silence) preset and a device toolbox to add mic objects.

PART 800-151-101

ClearOne's XAP 800 takes the revolutionary AP800 to the next level of functionality and becomes the new standard of audio conferencing performance.

Easy, effective and reliable the XAP 800 features a 12x12 matrix with level control at each cross point to simplify complex mixing operations; and 20Hz-20kHz bandwidth for full-range audio response. The XAP 800 uses ClearOne's proprietary Gentner Distributed Echo Cancellation® and noise cancellation technology.

Distributed Echo Cancellation features 130ms of tail time, which provides highly effective echo cancellation reaction time short prevents additional noise created.
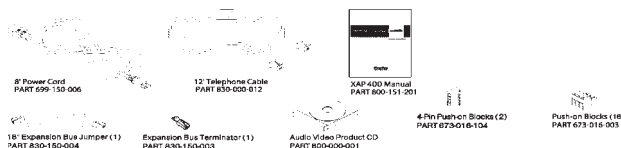

NOTE: No built-in phone line on this unit.

PART 673-016-104

Push-on Blocks (18)
PART 673-016-003

The XAP™ 400 conferencing unit combines the great features of the XAP™ 800 with a single-line digital telephone hybrid and 10W amplifier to create a stand-alone teleconferencing unit. It has four microphone inputs, a microphone mixer, echo and noise cancellation, and advanced audio processing and filters. The XAP 400 manages microphones and speakers, as well as local and auxiliary audio.

## XAP TH2 Phone Interface
Part# 910-151-301

ClearOne's XAP TH2 telephone interface routes caller audio from a single analog telephone line into the XAP 800 or 400 audio conferencing systems. Up to 16 callers can be added to a conference by using 16 XAP TH2s.

An Expansion Bus port that enables it to be linked to the XAP, which can then pass control to the XAP TH2. The XAP TH2 is configured with the G-Ware software and controlled via RS-232 or through contact closures on the DB25 port. XAP TH2 can access DTMF (touch-tone) dialing through the Expansion Bus or RS-232 connection, which allows you to dial telephone numbers or issue tones to access voice mail. The XAP TH2 will also store 10 speed dial numbers.

ClearOne. INSTALLED AUDIO CONFERENCING

GT 1524 Single Channel Echo Canceller
Part# 910-114-101

The GT1524 provides the highest possible audio quality available in a single-channel echo canceller and features a telephone interface to turn your existing audio system into a teleconferencing system. Plus, it has simultaneous two-wire/four-wire operation so you can audio conference and video conference a the same time.

The GT1524 connects to your existing system via an output from your mic mixer routed to the GT1524's line input and features a line output for an amplifier. For smaller rooms, you can simply connect to one mic and on speaker ot the unit. A 5W power amp is included.
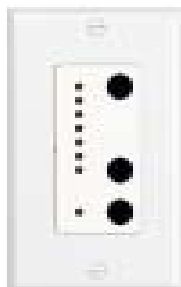

XAP Net
Part# 910-151-150

XAP™ Net brings Ethernet connectivity to all your XAP products. This advanced control interface gives you the freedom to access your ClearOne audio devices remotely via either local-area network or the Internet. Program your audio system or perform system diagnostics from anywhere.

XAP IR Remote
Part# 910-170-10

The AP IR Remote Conrol system operates the XAP product line. Using infrared transmission, it controls all XAP800, XAP400, and PSR1212 single and combined-unit systems. The XAP IR operates dialing, mute, connect, disconnect, and volume and is a cost effective alternative to expensive control devices.

XAP Control Panels

The Control Panel provides convenient control of zoning, volume, and other functions of the PSR1212, XAP800, and XAP400 and is available in two models: the Volume Control Panel and Select Control Panel.

Select Control Panel **Volume Control Panel**
910-155-050 **910-155-051**

ClearOne. CONTROLLER & INTERFACES

XAP Table-top controller
Part# 910-151-890

Start and navigate an audio conference without the need for touch panel control systems, which can be expensive, complex, or intimidating to users. The dial pad on the device resembles a telephone keypad for instant familiarity, and users can dial a conference call as easily as dialing a telephone with no training required. It offers five user-definable keys to manage the most commonly-used audio conference and presentation control functions, such as presenter mic volume up/down, lights on/off, projector on/off, screen up/down, etc. These keys are easily programmed using the included configuration builder software.

The controller comes with a 40-foot cable that connects to both the XAP and a power source, eliminating the need for batteries. Longer distances of up to 150 feet are easily achieved with standard Cat 3, Cat 5 or Cat 6 cabling. Connect directly to the XAP and send commands to third-party devices that are connected to the communications port on the XAP. Pre-printed labels with common presentation, audio conference, and room control functions apply easily to user-definable keys.

ClearOne. MICROPHONES

Button Mic
The Button Mic is ideal unobtrusive table top placement. Commonly used in custom applications in which mics are permanently built into the table, the button mic provides excellent pick-up range.

Button Omni-Mic Black   **Button Uni-Mic Black**
910-103-162   **910-103-164**

Delta Mic
910-103-340
The Delta Mic's professional design accentuates teleconferencing applications which demand high performance audio quality. Its compact size makes it ideal for conference table which require minimum visibility mics with 360-degree pickup.

Tabletop Mic
The Tabletop Mic is perfect for teleconferencing applications that demand high performance audio quality. Their small size makes them ideal for conference tables that require minimum visibility microphones.

Tabletop Omni-Mic   **Tabletop Uni-Mic**
910-103-160   **910-103-161**

AccuMic II
910-156-115
ClearOne's AccuMic II utilizes Gentner Echo Cancellation and noise cancellations to provide the clearest, most intelligible audio to enhance your video conferencing experience. Each AccuMic II contains three microphone modules and leading-edge DSP audio technology for superior sound.

AccuMic II Extension Mic
910-156-117
You can extend the audio pick-up range of the AccuMic II while maintaining sound quality by connecting an optional AccumMic II extension mic. This flexibility makes the AccuMic II a great fit in a variety of conferencing environments.

RM-D Dual rackmount adaptor for wireless tabletop mic
RM-S Single rackmount adaptor for wireless tabletop mic

The wireless conference mic brings benefits to the boardroom, conference center or training facility.

The wireless tabletop conference mic is a free-standing gooseneck style microphone firmly anchored in place by its low-profile, elegantly designed base. Turn the base over to reveal the specially designed compartment for housing the supplied transmitter. Place the easy-to-use microphone anywhere required.

No longer do you have to drill holes in tables, trench or core floors, run long cables or compromise the architectural integrity of an installation. Also available in an audio-encrypted version for applications that require secure voice information (medical, government & high profile corporation applications).

Hanging Ceiling Microphones

Ceiling mics may have to be used to cover general areas in meeting hall seating or in multi-purpose rooms that have flexible furniture set-ups and cabling to tables is not permitted.

Ceiling mics are not recommended as best practice in most conference rooms because the distance from talker-to-mic results in added "roomy-ness" and an increase in background noise. For an example of how distance from a mic affects sound, visit-   *http://clearone.com/ solutions/professional.php?content=main* and click the Audio Demo Link. If a client accepts the possibility that the sound may be affected and still wants "no mics on the table", then ceiling mics may satisfy the situation.

SET-TOP VIDEO CONFERENCING CARTS

DST ™ Monitor Cart
ClearOne DST Monitor Carts provide superior strength and mobility at an unbelievable price. More than 22" of interior cabinet depth offers plenty of room for peripheral equipment. The mobility and value of the ClearOne DST cart make it ideal for large corporate or educational facilities where resources are limited and must often be shared among multiple rooms. The DST easily supports up to 36"monitors for use in videoconferencing areas, training rooms and distance-learning classrooms. It also features generous cabinet space for mounting AV equipment.

ClearOne. SECURE CABINET & TABLES

Secure Cabinet
911-171-280

The Secure Cabinet houses a 32"
monitor and set top video conferencing
system. This attractive cabinet offers
the added security of a lockable
microphone pod pullout and a 1/2"
Lexan monitor cover.

Tables
Your table is not only the visual focus of
a meeting or video conference, it also
affects the communication dynamics.
Meeting Room Tables are designed in
a variety of shapes and sizes to help
create an optimal environment for your
meetings. Training Tables are de-
signed to be durable enough for factory
training rooms and lunchrooms. And
with your choice of laminates, they are
elegant enough for high-visibility
training rooms. All have modesty panel
and provisions for cable management.
