AUDIO PERFECT™ IR REMOTE

INFRARED REMOTE CONTROL SYSTEM

FEATURES/BENEFITS

- Only low-cost remote control solution available
- Ready to use—no programming necessary
- Easy program customization
- Easy-to-use, easy-to-install for any user
- Single-source vendor
- Small size for easy, hand-held operation
- Long battery life

PRODUCT OVERVIEW

The AP IR Remote Control System operates the most expandable and adaptable room audio system in the industry—the Audio Perfect® product line. Using infrared transmission, the AP IR Remote functions with an AP400 stand-alone system, an AP400/ AP800 combination, or an AP800/AP10 combination.

Made up of two components, the handheld remote control and the base station infrared receiver, the AP IR Remote Control system operates many features of an Audio Perfect system. These include connect, disconnect, dial a telephone number, redial, store speed dial numbers, activate speed dial, hook flash, adjust volume, and mute the microphones.

If you want to customize the remote control, you can. Simply press certain key sequences on the transmitter unit and you will customize how the system controls your AP products. And in the event of a power outage, the new programming will not be lost or altered because it is stored in the receiver's memory.

Transmitter

Dimensions:

7 5/8"L x 2 3/16" W x 1/2" H

Battery Type:

2 AAA

Battery Life:

Approximately 1 year

Receiver

Dimensions:

5" L x 2 3/4" W x 1" H

Power:

Powered by the AP system

Cable Length:

System

Range:

25-40 feet from transmitter to receiver

Angle of Acceptance:

90°-120°

Operating Temperature:

0°-50° C, 32°-122°F

Compliance Approvals:

FCC, Industry Canada, and CE
