Gentner's AP Video 1000

**The newest addition
to the
Audio Perfect Family**

The AP Video 1000 Videoconferencing system is designed for high end audiovisual system integration. It is easy to install, uses only a single rack space, and can be used with control systems like AMX and Crestron. The AP Video 1000 includes G-link which allows the simple combining of control functions with other Gentner products. These features coupled with Gentner's superior audio products and legendary technical support, make it the ideal choice for the installed system. In addition, you have just one manufacturer to deal with, Gentner, and we stand behind our products 100%.

The AP Video 1000 Videoconferencing system is world-wide compatible with all standards-based video conferencing systems. It is standards based (H.320) and interfaces to three BRI ISDN lines. The IMUX and NT-1 interfaces are built-in or the system can be ordered with ISDN S/T interfaces. It can also be ordered with a V.35 interface in place of the ISDN connection. The AP Video 1000 is capable of communication at 384kbps.

Other features include:

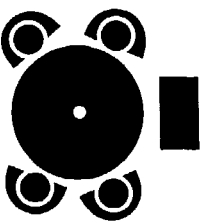

- **Full collaborative functionality (Netmeeting)**
- **Easy to use menu system for configuration**
- **Near and far end camera control**
- **Computer-free operation**
- **Field upgradable software**
