

# ET10

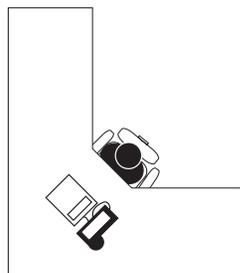

## TELECONFERENCER

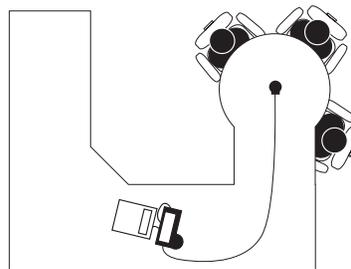

### PRODUCT OVERVIEW

Finally: a teleconferencer for the phone on your desk. Speakerphones are nice, but you're often stuck with fragmented phrases. Teleconferencers are better, but they're expensive, and won't work with the phone on your desk. The ET10 delivers the sound of more expensive teleconferencers at about half the cost. And, unlike units that require a dedicated analog telephone line, the ET10 connects to most digital or analog telephones used in business—just like the phone on your desk.

The ET10 is easy to use. Simply place the telephone handset on the ET10 for two-way audio through its built-in speaker and microphone.

The ET10 is small enough to use with the phone in a cubicle

Optional Extension Microphone lets everyone be heard in the office

### FEATURES/BENEFITS

- Full Duplex Audio provides natural, free flowing conversation
- Connects via Handset Cord—works with the phone on your desk without the expense of adding an additional phone line
- Allows you to use all the features of your phone (speed dial, transfer, hold, conference, etc.)
- Portable, easy to take along on business trips, conference in any location
- Headset Port—for those who prefer a headset over a handset for private conversations
- Tape Recorder Jack connects to your tape recorder for a high quality recording of your audioconference
