**Gentner Communications to Enter Videoconferencing Market**

---

SALT LAKE CITY, UTAH, November 10, 1998—Gentner Communications Corp. (NASDAQ: GTNR) has signed a contract with RSI Systems, Inc. (NASDAQ: RSIS) to use RSI's video technology in its own line of videoconferencing products.

According to Frances Flood, president and chief executive officer for Gentner, the onset of videoconferencing has led many dealers to augment the audio portion of video installations with Gentner equipment. "Recognizing that videoconferencing is now positioned for explosive growth, Gentner has responded to the requests of our distributors for a top-of-the-line video engine with best-in-class audio," she said. "Our collaboration with RSI enables us to provide an integrated video system that combines all the benefits of Gentner's Audio Perfect™ products with television-quality video."

"The quality of the audio is often overlooked in videoconferencing, yet audio is the most important element in conferencing," said Donald C. Lies, president and chief executive officer for RSI. "While video adds a new dimension to conferencing, without the audio a conference could not take place. The combination of RSI's superior video technology and Gentner's renowned audio technology will produce a product that is reflective of each company's expertise."

For nearly 20 years, Gentner Communications has been setting the standard for quality audio. "Our core competency has been, and will remain, audio," says Wayne Whiteley, audio product manager for Gentner. "Since audio is the most integral part of the conferencing industry, we see several opportunities to leverage our expertise. Our alliance with RSI will enable us to introduce Audio Perfect Video™."

RSI Systems, Inc., (Minneapolis, Minn.) is a manufacturer of sophisticated, high-performance videoconferencing system engines. Its system architecture provides enormous platform communications connectivity and combines that with simplicity of use and excellent durability and return on investment.

Gentner Communications Corporation ([www.gentner.com](http://www.gentner.com)) provides technology, service, and educational solutions for U.S. and international communications markets. The company has a wide product and service mix featuring remote facilities management systems, conferencing products, and a nationwide conference calling service.
