

MAX SKU TRANSITION ANNOUNCEMENT

April 29, 2007

For external distribution

Transition to new RoHS-compliant SKUs

Dear ClearOne channel partner,

Some time ago, the European Union enacted legislation that required the removal of all heavy metals and other hazardous substances from all electronic equipment shipped into Europe. This legislation is known as RoHS – the Restriction of Hazardous Substances.

In support of our continued commitment to the European market, ClearOne has been working for some time to re-engineer our audio conferencing product line to comply with the RoHS legislation. This involved re-designing our products with components that do not contain lead or other restricted materials.

We have chosen to move our worldwide SKUs to the RoHS versions to simplify manufacturing processes; we are also aware of other pending legislation in other parts of the world that will have requirements very similar to RoHS.

Therefore, we will transition all inventory, including SKUs shipped in the U.S.A., to RoHS-compliant hardware. In order to delineate compliant vs. non-compliant product, ClearOne MAX products will move to new part numbers.

Some important notes:

- This is a **SKU change only**
- The feature set is exactly the same
- Old and new part numbers interoperate – units can be daisy-chained together in Attach configurations with no impact
- Because of this, there is **no reason to rotate inventory** – please sell through the current products you have, then transition to the new part numbers

As we near the transition of these projects, we want to communicate our plans to our valued channel partners. The table below outlines the products that are being transitioned, along with the old and new part numbers

Product	Old P/N	New P/N	Transition Date
MAX Wireless	910-158-001	910-158-400	May 2007
MAXAttach Wireless	910-158-070	910-158-400-00	July 2007
MAX EX	910-158-015	910-158-500	July 2007
MAXAttach	910-158-055	910-158-500-00	July 2007
MAXAttach+1	910-158-055-01	910-158-500-01	July 2007
MAXAttach+2	910-158-055-02	910-158-500-02	July 2007
MAX EX Expansion Kit	910-158-050	910-158-555	July 2007

If you have any questions, please contact any of the ClearOne team members. Once again, we thank you for your partnership with ClearOne.
