The Power Just Keeps On Coming

August 1, 2000

For Immediate Release Contact: Victor C. Payona

PD 8 and PD8L, rack illuminator version, Power Conditioner models now incorporate professional grade spike, surge and EMI/RFI noise filtration components, in addition, to ETA's standard protection on all three legs of the incoming AC Power line. Three legs of protection is a universal feature on all ETA Power Conditioning Products and a must to insure against normal and abnormal power spikes inherent in public utility or other

TWO NEW POWER CONDITIONERS AVAILABLE FROM ETA SYSTEMS

Unique features of the PD8 and PD8L models include a surge protection alarm that notifies the user when a potentially harmful AC Power surge is in progress and Watchdog protection circuitry, with front panel L.E.D. indicator, always informing user of status and current level of spike protection.

Both touring quality fabricated models are 15 amps, 1800-watt capacity with 8 breaker protected U-grounded Edison outlets and are UL 1449 listed and carry a Three Year Limited Warranty.

ETA Systems, A Creative Light and Sound Company, is the manufacturer of Theatrical Lighting Products, Lightruss Truss Systems and Conditioned Power Distribution.
