

Elite SCREENS

Manual Pull-Down Screen
Elite Manual Series
-TYPE C-

USER'S GUIDE

MATTE WHITE

Pre-installation

1. Carefully unpack the screen
2. Always handle the screen in a leveled position on a clean surface.

Installation

Flush Wall Mounting

1. Using a tape measure, mark the keyholes that are located at the back of the screen's case end cap. 2. After marking the area and predrilled hole, insert the screw and leave about 1/8" of an inch from the wall to mount the screen. **Fig. 1**

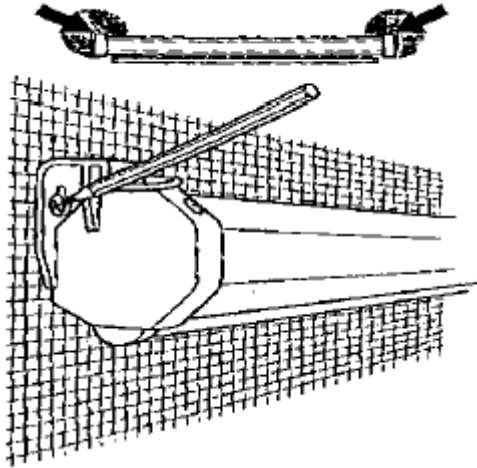

Fig. 1

Ceiling Mounting (additional hardware required)

Optional installation using a chain to hang the screen from the ceiling

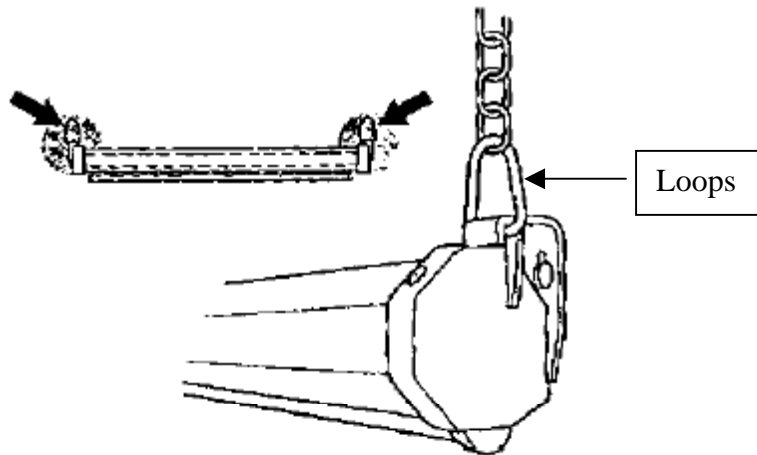

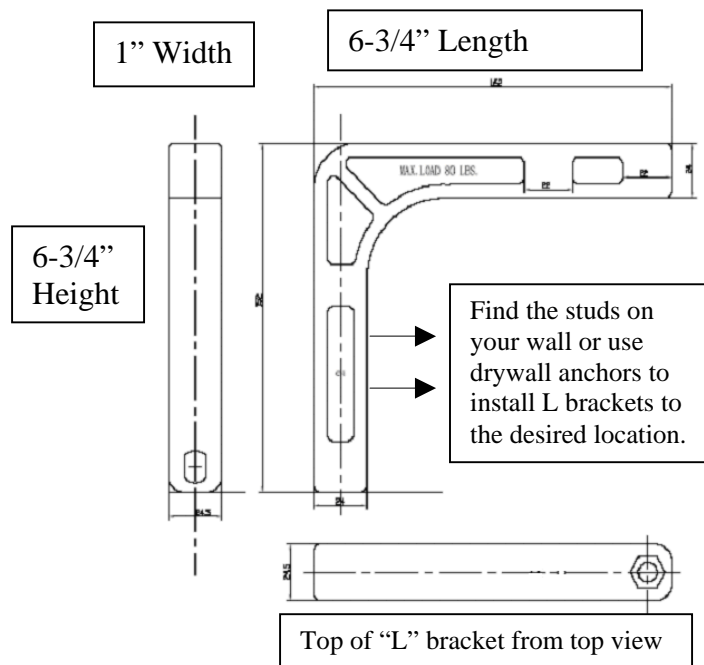

Fig. 2

2. You can also hang the screen on a ceiling by using a chain with s-hooks (not included) and hang it by the two loops located on each end of the case as shown on Fig. 2.

“L” Brackets Installation

SCREEN OPERATION

Note: Always pull the screen down in a 90-degree vertical angle and do not allow the screen to touch the screen case when the screen comes down to avoid damaging the screen material.

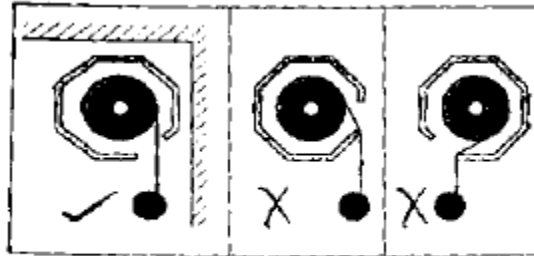

Fig. 5

1. Pull the screen down from the rope or from the handle only in a 90-degree angle. Do not attempt to pull the screen down by the surface or touch the screen, as it will damage the screen and void the warranty. **Fig. 5**

Note: An internal auto-lock mechanism system will cause the screen to stop and lock on the position on intervals.

2. If you want the screen to retract back, simply pull down the screen down more than 2 inches and retract the screen back by quickly and smoothly releasing it up gently. **Fig. 6** (Always release in a 90-degree angle and do not let go until the screen is entirely inside the case)

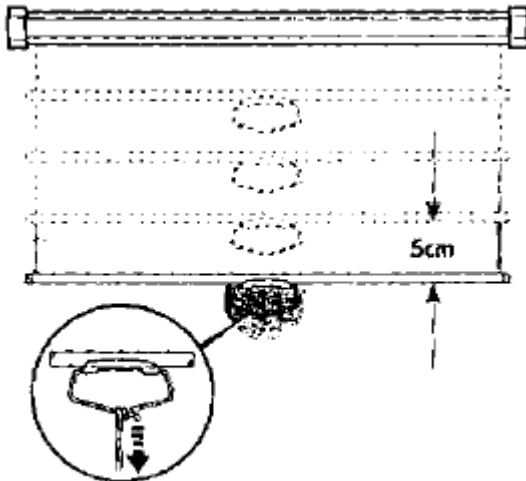

Fig. 6

Note: Improperly bringing the screen up/down will damage the screen material or rolling system.

Maintenance

Clean matte white screen material with a soft cloth and mild soap with water. When not in use, retract screen in it's housing to keep the surface clean

NOTE:

Regardless of mounting method, screen should be securely supported so that vibration or even abusive pulling on the viewing surface will not cause case to work loose or fall. Installer must insure that fasteners used are of adequate strength and suitable for the mounting surface chosen.
