

Difference between the Home and VMAX

	Home	VMAX	Description
Motor Type	Tubular Motor	Synchronized Motor	Tube motor is faster. Synchronized motor is smoother but slower
Housing	Aluminum	Metal	Aluminum case design provides a stylish luxury appearance
Hanging Bracket	Two	None	Hanging brackets allows easy installation/setup for wall or ceiling mounting
Standard Remote	IR	RF or IR	RF remote allows longer distance use and no direct aim limitation
Screen Material	Matte White w/ Fiber Glass	Matte White	Fiber Glass provides a flatter screen surface (only on models 120 and above)
Vertical Drop/Rise Position	Adjustable	Adjustable	Allows user to pre-define drop/rise position
3-way wire control switch	Removable	Permanent	Optional IR sensor replaces the switch and allows screen control with the remote

VMAX is suitable for most applications, but the Home Series does provide more features if needed.

VMAX "U" Series come in black finish w/IR remote

VMAX "X" Series comes in white finish w/ IR and RF remote and 6 inch "L" brackets
