

## **Mindshare Presentation System Product Descriptions**

### **84 Words**

The Envivio® Mindshare Presentation system is a highly optimized one-to-many communication system that delivers interactive media presentations live and on-demand to thousands of viewers over any IP network. Easy-to-use, the Mindshare Presentation system makes use of advanced MPEG-4 compression standards and technology to deliver all the elements of the presentation - video, audio, screen capture, text, images - as part of a single multi-track MPEG-4 stream. The system overcomes the usual limitations of synchronization, scalability, latency, and reliability found in traditional webcasting systems.
