

Approximate Charging Times for the BC-10B

The total charging current of our BC-10B charger is 1700mA (with 10 different pockets, each with its own dedicated charging circuit, the charging current per each pocket is 170mA).

The charging time is depending on the capacity of the Rechargeable Battery that be used in our ALS unit.

- For battery capacity of 1000mA : around 6 hours.
- For battery capacity of 1200mA : around 7 hours.
