

THE GENESIS OF ASSISTIVE LISTENING SYSTEMS

IN THE BEGINNING, ASSISTIVE
LISTENING WAS CREATED.
AND IT WAS GOOD.
THEN GENTNER SAID,
"LET IT BE SUPREMEPLY CLEAR."
AND SO IT IS.

Chances are you may know someone who stopped attending your services because they can't hear clearly. Statistics show about a third of people age 60 and older suffer from hearing loss. Bring them back into your congregation.

Gentner's affordable assistive listening systems not only amplify the audio but make it more intelligible. Your message becomes clearly distinguishable from background noises. And since our systems are digitally-tuned, you can lock on to any of 37 frequencies so the problem of "sinful" channel drifting is eliminated.

Call us at **1.800.964.3764** or **801.975.7200**. We'll help you create the perfect listening environment. Or visit us at **www.gentner.com**.
