Gentner's New Venture™ System

Transmitters and receivers designed specifically for:

Tour Audio and Language Translation

Venture operates using a wide area FM signal to provide maximum voice intelligibility in virtually any environment.

- **The 216 MHz frequency has recently been approved by the FCC for non-ADA hearing assistance applications**
- **Gentner is the first company to provide transmitters and receivers that operate in the 216 MHz frequency range**
- **The systems are easy to use and affordable**
 - ⇒ **Tuneable to 19 different frequencies**
 - ⇒ **Digitally tuned to prevent drifting**

**Watch for your information package that will include
Venture-Base, Venture-Express, Venture-1 and Venture-6**

Or contact Brittney Tugaw, ALS Sales - 801-974-3778
