

Translation System Package

Part# 930-TRA-NSL

The Translation System Package includes two Venture Base Stations, ten Venture-1s, transmitter antennas, 50ft flexible coax cables, ground plane antenna mounting plates, two rack mount kits, and five packs of Ni-Cad AA re-chargeable batteries. This system is designed to accommodate ten listeners, but is expandable to handle additional listeners.

Transmitter antenna, 50ft flexible coax, ground plane antenna mounting plate

Added Flexibility:

Gentner ALS and Venture systems allow you to add as many belt packs as there are listeners.

The Venture 6 allows the user the flexibility of selecting up to 6 different listening channels at the flick of a dial.
