

Advanced Collaboration Everywhere.

### Enterprise Solution

The new inSORS Grid:IG2 software packs power and reliability to conference rooms, offices and desktops bringing remote teams together instantly.

More and more corporations are demanding high end visual collaboration solutions to drive productivity of their globally dispersed teams. inSORS designed the IG2 software and product line to deliver enterprise collaboration with instant connectivity and continued presence for individuals and groups.

### It's "Like You Are There"

With multiple, simultaneous video and data views for each location, IG2 creates an experience that is as

if you were in the same room. Full duplex audio allows for true two way conversations. IG2 provides independent audio and video controls for each site.

### On Demand Inclusion

With easy to use graphical interface, users create instant collaboration sessions or schedule meetings in advance. The directory can instantly invite any team members to a session or set up a scheduled session through enterprise email system.

### Data and Application Sharing

inSORS' IG2 features a suite of data and application sharing and integration tools, including application sharing as a web page or

a full motion video.

The IG2 tool set also include text chat, interactive whiteboard, file transfer, and meeting administration.

### Enterprise Integration

Along with instant connectivity to other inSORS Grid users, IG2 also allows you to connect to standard videoconferencing devices. inSORS Grid users can also bring in remote users by phone using our new VoIP driven IG dialer.

## ADVANCED COLLABORATION EVERYWHERE

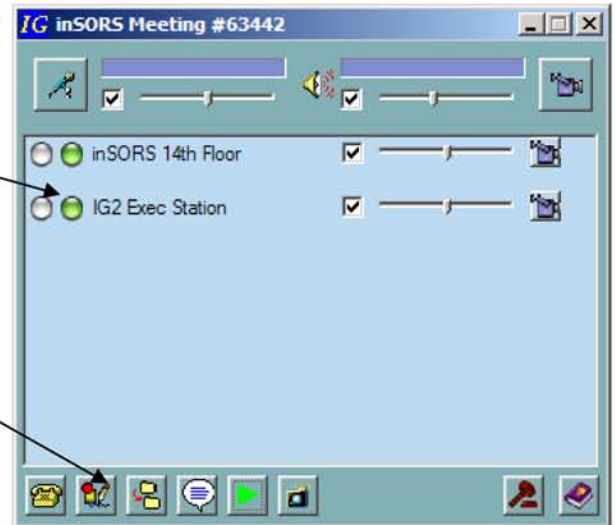

Over the IOCOM grid connect to conference rooms, desktops, video conference units & phones or even stream out to those outside the grid in a web browser!

# IG2: Enterprise Collaboration

Independent audio and video controls for each participant

Suite of tools supporting data and application sharing and integration

IG2: Easy to Use Interface

## Presence and Meeting Management

- Know instantly who is available
- Invite anyone in the organization
- Directory of Favorite People
- Create an Away message
- Manage schedule meetings
- Connect for impromptu or scheduled meetings

## IG2 addresses the pain points of Enterprises that pursue video collaboration today...

“There are a lot of conferencing and collaboration products out there, but not too many span from the conference room to the desktop. And only a few have the flexibility of IG2 to bring in computers, phones, and video-conferencing systems into a single environment. There are lots of unique capabilities built into IG2, perhaps because the inSORS people...have a different way of looking at the problem”  
—Andrew Davis, Wainhouse Bulletin

“Using InSORS IG2 software, it felt as if we were in the same room as the person interviewed in Chicago or in Manchester. It was natural and not tiring to talk for 90 minutes.”  
—Richard Line, VCInsights Newsletter

“inSORS' presence capability is the electronic equivalent of leaning out of your cubicle to ask someone a question.”  
—Elliot Gold, Chicago Tribune

IOCOM

# IG2: Powerful Collaboration Tools
