

A DVD Combo That's Real Flat, and Real Beautiful

I Art™

JVC™

"The Art of Imagery"

Real Flat Picture Tube ...

JVC's flat screen television incorporates a Real Flat Picture Tube that provides a more natural looking picture, one free of distortions, from corner to corner. The flat tube also helps reduce ambient light reflections to produce crystal-clear images. See the undistorted image of the flat tube versus the bloated image of the conventional tube (below).

Real Flat Picture Tube

Conventional Picture Tube

Conventional picture tubes are round, some slightly more than others. The rounder the picture tube, the greater the distortion of the image displayed. With JVC's Real Flat picture tubes, the picture's focus is perfect from corner to corner, eliminating any distortion.

INVAR Shadow Mask ...

JVC's INVAR Shadow Mask makes use of a special alloy that resists thermal distortion and provides bright, detailed pictures and the truest, purest colors even under the most demanding conditions.

Front Input Jacks / Illuminated Remote Control ...

Two features to help make using your TV/DVD combo even easier. The Front AV Input jacks allow you to quickly and easily connect a camcorder, game console, or even a VCR to your TV/DVD combo. The RM-C394 Remote Control features illuminated key feature buttons so you can easily use it, even in low-light conditions.

Great Standard Features ...

The AV-20FD22 also comes with many of the great features found on JVC's regular line-up of color televisions. These features include a 2-Line Digital Comb Filter, for the smoothest possible picture; MTS Stereo Sound with SAP (Second Audio Program) for clear stereo sound and the ability to listen to a separate soundtrack (if broadcast); a multi-function timer, to turn your television on in time for a favorite show, or to turn the television off automatically; V-Chip to keep younger viewers from seeing any programming that you feel may be objectionable; and JVC's onscreen menu system with menus in English, French and Spanish for your convenience.

DVD Player Features ...

Built-in to the AV-20FD22 is a full-featured DVD player with CD playback capability. Features include: Repeat Play, which lets you play an entire DVD disc over and over again; Program Play, which lets you select the playback order; Repeat A-B, which plays back a portion of the DVD you select; and Random Play, to shuffle the playback order of the CD tracks automatically.

In addition to the playback options, the DVD player includes these great features: Zoom; to let you enlarge a selected portion of the onscreen picture; Slow, to let you slow down the playback of the DVD; and Subtitle mode, to display any subtitles that may be included on the DVD.

AV-20FD22
