Flat Screen High Definition TV

HDTV
HIGH-DEFINITION TELEVISION

JVC's real flat high definition televisions offer superior picture and sound reproduction and elegant styling at an affordable price

High Quality Picture & Sound Features

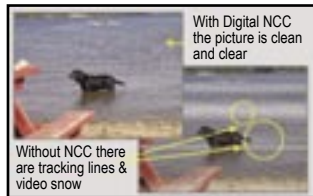

- **Real Flat CRT HDTV with D.I.S.T. 1080i** – JVC's D.I.S.T. 1080i seamlessly upconverts any video source to 1080i which drastically reduces jagged edges and increases the resolution of any video source
- **ATSC / QAM Reception Capabilities** – A built-in ATSC tuner allows you to receive over-the-air digital terrestrial broadcasts. Clear QAM tuner allows you to receive unscrambled digital cable signals
- **HD Range Digital Super Detail Circuitry (DSD)** – this JVC exclusive state-of-the-art focusing technology works to keep the picture completely focused for both still and active images. It is especially beneficial in high action scenes where there

is often less contrast on the edges of fast moving objects. HD DSD enhances the edges of these objects to minimize blur and recreate a picture as sharply focused as the original

- **16Mega 10bit 3D Y/C with 3D Noise Reducing Comb Filter** – this digital comb filter employs 10bit A/D converters to enhance Y/C output thereby drastically reducing dot crawl and other cross color interference that can occur from ordinary frame sampling

- **Digital Noise Clear Circuitry (NCC)** – Digital NCC reduces the video snow and even tracking lines commonly found in older video sources such as classic VHS tapes and your favorite old home movies

- **Natural Cinema (3-2 Pull Down)** – Natural Cinema employs 3-2 Pull Down technology to drastically reduce the jagged edges that normally occur when film is converted to video

Notes & Disclaimers

- Specifications are tentative and subject to change without notice.
- Accepts 480i, 480p, 720p, and 1080i signals and displays at 1080i.
- BBE is manufactured under license from BBE Sound, Inc.
- HDMI is a trademark of HDMI Licensing L.L.C.
- All images on this sheet are simulated to show effect.

D.I.S.T.

HDMI
HIGH-DEFINITION MULTIMEDIA INTERFACE

- **5 Aspect Modes w/EZ Fill** – selectable aspect modes let you choose the aspect ratio to suit your preferences. Standard signal modes include 4:3 and 16:9. HD signal modes include 16:9, Vertical Stretch, and HD Zoom
- **Selectable VSM** – allows you to choose when you want to apply Velocity Scan Modulation's edge sharpening technology
- **A Full Complement of Standard Features** – includes a Universal Remote Control, Smart Sound, Smart Captions, Channel Label/Video Input Label, 5 Video Status Modes (D6500K/Standard/Game/Theater/Dynamic), Hyper Scan High Speed Channel Surfing, Return+, Sleep Timer, Front Panel Lock, Noise Muting, and more
- **Exclusive Sound Package** – Sound features include 20 Watts Total Audio Power, BBE High Definition Audio for natural and pure sound reproduction, and Hyper Surround for virtual surround sound

Convenience Features

- **Inputs & Outputs** – Input terminals include an HDMI w/ HDCP Digital Video Input, a Smart Video Input for scanning and receiving signals from an AV receiver, 2 Auto Sensing Component Video Inputs, 3 S-Video Inputs, and 4 AV Inputs. Output terminals include an Optical Digital Audio Output and a Fixed Audio Output
