- Linear PCM Audio Recording (XP Mode Only)
- High-Resolution GUI (English/French/Spanish)

### One-Touch Expert Dubbing (VHS→DVD)

The DR-MV5S comes with "One Touch Expert Dubbing" button. Simply press the button, and the unit starts VHS-to-DVD dubbing with the following advanced functions:

- 1) Auto Thumbnail Creation (Dubbing)**  
The JVC recorder automatically creates thumbnails by detecting the tape-encoded signals that indicate program changes. This allows easy access to each dubbed program.
- 2) Auto Blank-Cut Dubbing**  
The unit skips any blank space in the source. This results in DVD discs free of the unwanted blank spaces typically seen between VHS-recorded programs.
- 3) Auto Recording Mode Optimizer**  
Press and hold the "One-Touch Expert Dubbing" for 2 seconds, and the unit automatically selects the optimum bit rate to ensure the best picture quality possible while precisely fitting the whole content to a 4.7 GB disc. Dubbed pictures are free of unwanted blank space.
