GENESSA

JVC's high definition LCD televisions incorporate Genessa, the world's 1st CPU dedicated to picture processing

High Quality Picture & Sound Features

- **High Resolution Widescreen W-XGA LCD Display (1366 x 768)** – provides high brightness, wide viewing angle, and a flicker-free high resolution widescreen picture
- **4th Generation D.I.S.T. w/Genessa 770p** – JVC's 4th generation D.I.S.T. detects and seamlessly up-scales any video source to display at 770p. New Genessa, the world's 1st CPU dedicated to image processing, provides 32bit "turbo" powered picture processing. The Genessa chip insures faster and more efficient sampling that drastically reduces jagged edges and increases the resolution of any video source

- **Motion Adaptive Dynamic Gamma Correction (DGC)** – on an area by area basis, JVC's exclusive Motion Adaptive DGC utilizes data from every signal level to insure that tonal gradations are preserved in dark areas making sure images never appear muddled

- **New Smart Picture Technology** – by examining the brightness level of incoming image sources, new Smart Picture technology compensates for scenes, frame by frame, to insure they are displayed at the perfect brightness level without sacrificing contrast and detail
- **New 5 Point Color Management System (CMS)** – expanding upon our exclusive 4 Point CMS, we've added a 5th axis dedicated to flesh tone color sampling. Overall, CMS compensates for color range limitations and insures JVC colors are reproduced with dimension and vivid detail
- **HD Range Digital Super Detail Circuitry (DSD)** – keeps the picture completely focused for both still and highly active images

Sound & Convenience Features

- **Exclusive Sound Package** – sound features include: Oblique Cone Speakers with 20 Watts Total Audio Power, Advanced Hyper Surround for virtual surround sound, Active Hyper Bass, and BBE High Definition Audio for natural & pure sound reproduction
